📍 Ahmedabad, Gujarat, India-380050

PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning undergraduate pursuing B.Tech in AI & ML at GLS University. Passionate about building intelligent systems using Machine Learning and Natural Language Processing. Experienced in developing AI-driven solutions including recommendation systems and NLP-based applications. Proficient in Python, Java, SQL, and machine learning libraries, with a strong foundation in data structures, algorithms, and software development. Actively seeking internship and placement opportunities to apply technical skills and contribute to innovative AI solutions.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, SQL, JavaScript
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Recommendation Systems, Model Evaluation
- **Artificial Intelligence:** Natural Language Processing (NLP), Data Preprocessing, Feature Engineering
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV
- **Development Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Anaconda
- **Database Technologies:** MySQL, PostgreSQL

EDUCATION

Bachelor of Technology in Artificial Intelligence and Machine Learning
GLS University, Ahmedabad, Gujarat, India

June 2023 – June 2027

- Current SGPA: 8.46 / 10.0
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Artificial Intelligence, Digital Image Processing, Compiler Design, Recommendation Systems.
- Strong academic foundation in AI/ML concepts with hands-on project experience.

PROFESSIONAL EXPERIENCE

Treasurer

GLS ACM Student Chapter

October 2025 – Present

- Managed budgeting and financial records for chapter events and activities.
- Coordinated with organizing teams to ensure smooth execution of technical workshops and student engagement initiatives.
- Demonstrated leadership, teamwork, and organizational skills while supporting the effective functioning of the student chapter.

PROJECTS

AI Chanda Identifier System – Smart India Hackathon 2025 (National Finalist)

Technologies: Python, Natural Language Processing, Machine Learning, Streamlit

- Developed an AI-based system to identify Sanskrit Chandas (metrical patterns) from Sanskrit verses using NLP techniques.
- Implemented text preprocessing and pattern recognition methods for accurate Chandas classification.
- Built an interactive interface for efficient Sanskrit verse analysis and metrical identification.
- Qualified for the National Finals of Smart India Hackathon 2025 and represented the team at Guntur, Andhra Pradesh.

AI Government Schemes Recommendation System (Capstone Project)

Technologies: Python, Machine Learning, NLP, Pandas, Streamlit

- Developed an AI-driven recommendation system to suggest suitable government schemes based on users' demographic and eligibility information.
- Integrated Natural Language Processing techniques to understand user requirements and improve the relevance of recommendations.
- Implemented classification and filtering mechanisms to match users with the most appropriate schemes efficiently.
- Designed an interactive interface to simplify the scheme discovery process and enhance accessibility for end users.
- Focused on improving recommendation accuracy and user experience through continuous evaluation and refinement of the system.

Safarnama – Travel Planner Website

Technologies: HTML, CSS, PHP, MySQL, XAMPP

- Developed a travel planning platform featuring destination exploration, travel packages, and online registration functionalities.
- Designed responsive and user-friendly webpages using HTML and CSS to enhance user engagement and accessibility.
- Implemented PHP backend services and integrated MySQL databases for secure storage and management of user information.
- Developed package management and newsletter subscription features to improve the overall user experience.
- Collaborated in a team-based environment, contributing to frontend development, backend integration, and database design.

CERTIFICATIONS AND ACHIEVEMENTS

- **Smart India Hackathon 2025 – National Finalist**, represented the team at the Grand Final held in Guntur, Andhra Pradesh.
- **Treasurer, GLS ACM Student Chapter** – contributed to the planning and execution of technical events and student initiatives.
- Actively participated in Government hackathons and collaborative projects focused on Artificial Intelligence and Machine Learning.

ADDITIONAL INFORMATION

Availability: Open to Internships and Full-Time Opportunities

Location: Open to relocation

Languages: English (Fluent), Hindi (Fluent), Gujarati (Native)
