PROJECTS

Indian Sign Language Detection System | Python, OpenCV, ML, Flask 🐙

- Developed a real-time Indian Sign Language detection system using computer vision and machine learning with live webcam-based gesture recognition.
- Implemented Random Forest, KNN, and MLP models with confidence tracking, translation buffer, and deployed interactive interface on Vercel.

Employee Management System | Flutter, Dart, SQLite 🐙

- Built a role-based employee management application with admin and employee dashboards using Flutter and SQLite.
- Implemented attendance tracking, salary management, department handling, query resolution workflows, and dashboard analytics.

Laptop Recommendation System | Python, Flask, Scikit-learn 🐙

- Developed a content-based laptop recommendation system using TF-IDF vectorization and cosine similarity for personalized recommendations.
- Implemented filtering, ranking, comparison, and popularity-based scoring using Flask and Scikit-learn.
