

ARYAN CHAUHAN

Frontend Developer | React.js | TypeScript | Tailwind CSS

aryanreadyforjob@gmail.com | +91 9510902538 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Ahmedabad, Gujarat, India 382340

PROFESSIONAL SUMMARY

Design Developer who works directly with directors to design, build, and ship products end-to-end. Strong communicator with a track record in business and product growth, hands-on in researching new features and turning them into shipped innovation. Comfortable owning the full loop, from idea and design to code, growth, and team collaboration, at the leadership level.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Java, C, C++, SQL, HTML5, CSS3

Frontend Technologies: React.js, Tailwind CSS, Bootstrap, GSAP (GreenSock), Three.js

Backend & Database: Node.js, Django, PostgreSQL, Firebase, REST APIs

Tools & Platforms: Git, GitHub, Visual Studio Code, Vite, npm, Figma, Cursor, Linux Scripting

AI Development Tools: ChatGPT, Perplexity Pro, Gemini Pro

Core Competencies: Component-based UI Architecture, Responsive Web Design, Performance Optimization, Cross-browser Compatibility, API Integration, System Design Basics, Agile Development

EDUCATION

Bachelor of Technology in Computer Science

June 2023 – June 2027

Gujarat Law Society University, Ahmedabad, Gujarat, India | CGPA: 8.0/10.0

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Web Development, Computer Networks
- Actively engaged in government and college-level hackathons, demonstrating strong problem-solving and teamwork skills
- Proficient in web development with additional expertise in C, C++, Java, Linux Scripting, and SQL

PROFESSIONAL EXPERIENCE

AI Intern | GlobalVox Ventures Pvt. Ltd. (Ahmedabad, On-site)

April 2026 – Present

- Solely owning design and development of the company's product vertical end-to-end; designed and developed two complete product websites from concept to deployment, with upcoming product design also under my ownership
- Leading the marketing team alongside product work, delegating tasks, coordinating campaign execution, and aligning marketing efforts with product launches
- Managing communication with multiple clients on an ongoing basis: preparing Product Requirement Documents (PRDs), issuing quotations to clients, and evaluating quotations received from external service providers
- Working on-site full-time, collaborating directly with management and cross-functional teams to translate business requirements into shippable product features

Software Development Engineer Intern | Bluestock™ (Remote)

June 2025 – July 2025

- Built full-stack web application using Django, PostgreSQL, and Bootstrap, implementing secure REST APIs and admin dashboards supporting 1,000+ records with role-based access control
- Improved UI responsiveness and optimized component rendering by refining reusable React components and layouts, ensuring smooth performance across devices and screen sizes
- Integrated frontend interfaces from Figma designs, handled secure file uploads, and ensured responsive, cross-browser compatibility
- Collaborated with backend team to design API endpoints and implement efficient data flow throughout the application

President | GLS ACM Student Chapter

October 2025 – Present

- Led multiple technical events, managing teams, volunteers, and execution end-to-end for 200+ students
- Coordinated with industry speakers and mentors, demonstrating strong leadership, communication, and event management skills
- Led a team of 10+ volunteers to execute 3 technical events including workshops, coding competitions, and tech talks
- Fostered technical community building and knowledge sharing among student members

PROJECTS

Smart India Hackathon 2025 – National Finalist

Technologies: React.js, TypeScript, REST APIs [App GitHub](#) | [Web GitHub](#) | [YouTube Demo](#) | [MVP](#)

- Selected as finalist among thousands of teams nationwide, developing innovative solution for real-world problem statement
- Built responsive, user-centric frontend interfaces with React and TypeScript, contributed to UI/UX flow, feature integration, and on-ground debugging while collaborating closely with team under hackathon timelines
- Played key role in technical presentations and solution walkthroughs, clearly communicating frontend architecture and impact
- Demonstrated leadership by taking initiative, coordinating teamwork, and rapid problem-solving under pressure

LendAHand – Google Solution Challenge 2025 (Team Lead, Team KARN)

Technologies: React, Node.js, Flutter, Firebase, PostgreSQL, Gemini APIs [App GitHub](#) | [Web GitHub](#) | [Live Demo](#) | [YouTube Demo](#) | [MVP](#)

- Led cross-functional team to build social impact platform connecting vulnerable populations with NGOs, shelters, and employment opportunities
- Architected responsive web frontend using React.js while coordinating parallel mobile app development in Flutter
- Implemented Node.js backend with PostgreSQL database and integrated Google's Gemini APIs for intelligent matching
- Managed project timeline, delegated tasks, conducted code reviews, and ensured seamless integration across platforms

Apple iPhone 15 Website Clone

Technologies: React, TypeScript, Tailwind CSS, GSAP, Three.js [GitHub](#) | [Live Website](#)

- Built pixel-perfect clone of Apple's official website showcasing advanced frontend development skills
- Implemented complex 3D animations and interactive product visualizations using Three.js and GSAP
- Optimized rendering performance for WebGL-based 3D models while maintaining 60fps across devices
- Utilized TypeScript for type-safe development and Tailwind CSS for responsive, utility-first styling

Logbook360 – Product Website & Web App

Technologies: React.js, TypeScript, Tailwind CSS, REST APIs [Live Website](#)

- Owned end-to-end design and development of the Logbook360 product website and web app, from concept and UI/UX design to deployment
- Built responsive, component-based frontend architecture, ensuring pixel-perfect implementation across devices and browsers
- Collaborated directly with company leadership to translate product requirements into a shippable, market-ready website and application
- Iterated on UI/UX based on stakeholder feedback to align the product experience with business and growth goals

Gvox – Product Website

Technologies: React.js, TypeScript, Tailwind CSS, REST APIs [Live Website](#)

- Designed and developed the Gvox product website end-to-end, taking full ownership from concept through deployment
- Built a responsive, high-performance interface aligned with brand identity and product positioning
- Worked directly with management and cross-functional teams to shape the product narrative and user experience
- Ensured cross-browser compatibility and optimized load performance for a polished production launch

CERTIFICATIONS & ACHIEVEMENTS

- Smart India Hackathon 2025 – National Finalist (selected from thousands of teams nationwide)
- Winner, AMD Slingshot Regional Ideathon – Silver Oak University, hosted by Hack2skill (2026)
- Google Solution Challenge 2025 – Participant (submitted LendAHand social impact platform)
- President, GLS ACM Student Chapter – Leading technical community of 200+ students
- Active open-source contributor on GitHub with portfolio of 10+ production-ready web development projects
- [Complete Certificates Collection](#)
