PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student at GLS University specializing in Artificial Intelligence & Machine Learning. Hands-on experience building end-to-end ML-powered web applications and AI-driven finance automation using Python, React.js, and Node.js. Passionate about leveraging AI to solve real-world problems; seeking a software engineering or AI/ML role where I can ship working automation.

EDUCATION

B.Tech — Computer Science & Engineering (AI/ML) — GLS University, Ahmedabad Aug 2023 – May 2027

- Specialization in Artificial Intelligence and Machine Learning
- Relevant coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Object-Oriented Programming, Computer Networks

EXPERIENCE

AI & Finance Automation Intern — Kaival Shah & Co., Chartered Accountants, Ahmedabad May 2026 – Present

- Built Python automation scripts for data extraction, transformation, desktop tools, webapps and reconciliation workflows and automated MIS generation.
- Integrated the Model Context Protocol (MCP) of multiple ERPs to enable AI-driven data retrieval, real-time financial querying, and structured reporting pipelines.
- Developed Claude/LLM-based workflows and prompt-engineering frameworks for financial analysis, audit support, and automated document generation.
- Designed AI-powered dashboards (DAX measures, automated refresh) that pair ERP data with AI-generated variance commentary and alerts.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, PHP, HTML/CSS, SQL

Frameworks & Libraries: React.js, Node.js, scikit-learn, pandas, NumPy, SciPy

Databases: SQLite, MySQL

Tools & Platforms: Git, GitHub, REST APIs, VS Code, MCP Servers, ERP (Dynamics 365 Business Central),

Concepts: Data Structures & Algorithms, OOP, Machine Learning, NLP, ATS Optimization, Data Preprocessing, Model Training

PROJECTS

HireLoop — AI Resume & Cover Letter Generator | *React.js · Node.js · Python · scikit-learn · SQLite*

- Built a full-stack AI web app that tailors resumes to job descriptions and auto-generates cover letters using NLP.
- Developed an ATS scoring engine with scikit-learn using TF-IDF vectorization and cosine similarity for real-time compatibility scores.
- Designed a React.js frontend and RESTful Node.js backend handling ML inference, document processing, and SQLite persistence.

Satellite Image Classifier | *Python · scikit-learn · PHP*

- Trained a multi-class ML model to classify satellite terrain types (desert, forest, cloudy) with image preprocessing pipelines.
- Integrated the model into a PHP web interface for real-time image upload and terrain classification.

ReconTest — Tiered Hungarian Ledger Reconciliation Tool | *Python · pandas · SciPy · pdfplumber · Tkinter*

- Built a desktop app with a clean three-layer architecture that reconciles two party ledgers and exports a colour-coded, tier-labelled Excel match report.
- Engineered a matching engine using the Hungarian algorithm (SciPy `linear_sum_assignment`) for globally optimal pairing across three confidence tiers (HIGH/MEDIUM/LOW), treating date gap as a hard constraint.
- Developed format-agnostic parsers for Tally and SAP Business One xlsx and text-based PDFs, normalizing diverse exports into a single canonical data model.

CERTIFICATIONS

- Software Engineering Job Simulation — JPMorgan Chase & Co.
- Green Skills and Artificial Intelligence — Skills4Future Program (NASSCOM / UN Initiative)
- Fundamentals of Java Programming — Board Infinity

KEY STRENGTHS

Problem-Solving • Analytical Thinking • Team Collaboration • Adaptability • Leadership • Communication
