ACADEMIC PROJECTS

Real-Time Human Behavior Simulation with Safe & Adaptive Digital Twin

Technologies: Python, HTML, CSS, JavaScript, Docker, Machine Learning

- Designed an AI-powered behavior simulation platform to address the challenge of detecting abnormal user behavior and potential security threats in real time. The platform analyzes user activities, identifies anomalies, and evaluates cyber threats within a secure sandbox environment.

Digital Twin for CO₂ Capture in Urban Settings

Technologies: Python, HTML, CSS, JavaScript, SQLite, CesiumJS, Google Earth Engine, OpenWeather API

- Developed a simulation platform to address the challenge of monitoring urban CO₂ emissions and evaluating carbon capture strategies. By integrating environmental and weather data, the platform provides interactive 3D visualizations to compare different CO₂ reduction scenarios.

Gamified Rural Development Planning Platform

Technologies: HTML5, CSS3, JavaScript, Three.js

- Created a game-based web application to address the lack of practical learning in rural planning and development. The platform enables users to simulate infrastructure planning, budgeting, and resource allocation through an interactive 3D environment.

CO-CURRICULAR ACTIVITIES

- Organized a university-level **Bug Bounty event** with 100+ participants, coordinating cybersecurity challenges and event execution.
- Actively participated in technical workshops, hackathons, and university events.

EDUCATION

Faculty of Engineering and Technology, GLS University

BTech Computer Science Engineering
2023 – 2027 | Current SGPA(SEM VI): 9.01

Nirman High School

Higher Secondary Certificate (Class XII)
GSEB | 2023 | 53%

Secondary School Certificate
GSEB | 2021 | 80%

SKILLS

- Programming Languages:** C, C++, Python, JavaScript
- Web Technologies:** HTML, CSS, JavaScript, PHP
- Database:** MySQL
- Tools:** Git, GitHub, Docker, VS Code, XAMPP
- Networking & Security Tools:** Cisco Packet Tracer, Wireshark, Nmap, Burp Suite

ACHIEVEMENTS AND CERTIFICATIONS

- Smart India Hackathon (SIH) 2025** – Finalist
- Smart India Hackathon (SIH) 2024** – Finalist
- Research Paper – Microsoft CMT (IEEE):** Co-authored a paper on an Enterprise ERP SOC Simulation Platform, selected through Microsoft CMT for presentation.
- NPTEL** – Recommender Systems
- Coursera** – Java Programming Fundamentals
