Motivated Computer Engineering student with hands-on experience contributing to AI-based projects, particularly in UI/UX design and product development. Seeking opportunities according to my skills in building user-centric, real-world solutions while continuing to grow in machine learning, ui/ux and development.

CORE SKILLS

- Languages: Python(Pandas, Sckit-learn, Matplotlib, NumPy, OpenCV), C++, SQL, HTML, CSS, Java Script
- Core Areas: AI/ML, DBMS, UI/UX Design (User-Centric Design, Wireframing, Prototyping, Usability)
- AI/ML Exposure: Recommendation Systems, Data Cleaning
- Tools & Tech: OOP, Operating System, Jupyter, APIs, Git, Figma, Canva, Excel, PowerBI, Computer Networks
- Other Skills: Data Scraping, Presentation, Documentation, Public Speaking, Anchoring and Research Paper drafting

PROJECTS

Chandodaya – Vedic & Classical Prosody Analyzer (Ongoing)

- Contributed to an AI-based system for Sanskrit metre (Chandas) identification
- Worked on UI/UX design to improve clarity and usability of outputs
- Assisted in data scraping and dataset preparation
- Supported implementation using Python and structured data handling
- Helped in creating presentations and explaining system workflow
- System supports 585 Chandas patterns with explainable output

AI-Powered Personalized Tourism System (On Going)

- Contributed to building a personalized travel recommendation system using AI/ML
- Designed user interface and experience for better interaction
- Assisted in data collection, structuring, and preprocessing
- Worked with APIs for integrating real-world data (maps, weather)
- Helped present system architecture and recommendation workflow
- System generates dynamic itineraries based on user preferences

Research Paper Recommender System (Machine Learning, NLP, Python) (Ongoing)

- Built a content-based recommendation system for research papers
- Utilized TF-IDF and similarity functions for document similarity
- Performed text preprocessing and feature extraction

MedVault DeCR – Decentralized Clinical Records (Team Project)(2025)

- Contributed to a blockchain-based healthcare record system with secure data access and consent management.
- Worked on UI/UX design and system workflow for patient–doctor interaction.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML Specialization)

- GLS University, Ahmedabad, Gujarat
- Expected Graduation: June 2027
- Current CGPA: 7.5

ACHIEVEMENTS & CERTIFICATIONS

Core Team Member – ACM Student Chapter, GLS University

- Contributed to establishing and promoting activities for the student chapter.

Cybershadez Technical Event – Volunteer & Contributor

- Worked as invigilator and question creator for the Code Hunter competition.

Poster Presentation Competition – 2nd Prize

- Cybershadez 2025, GLS University

Certification – Green Skills and Artificial Intelligence

- Skills4Future Program, GLS University

Finalist - Smart India Hackathon 2025 Dec 2025

Finalist – Genesis Hackathon (0xGenIgnite), NIT Goa

STRENGTHS

- Problem Solving
- Analytical Thinking
- UI/UX & Product Thinking
- Adaptable and Quick Learner
- Team Collaboration
- Ability to Work Under Pressure

LANGUAGES

- English
- Hindi
- Gujarati
- Tamil
