

ARYA PANDEY

Cybersecurity Enthusiast — Network Security — Vulnerability Assessment

aryapandey0555@gmail.com — +91 9519003644 — [LinkedIn](#) — [GitHub](#)

Ahmedabad, Gujarat, India

Professional Summary

Motivated and detail-oriented Cybersecurity enthusiast pursuing a Bachelor of Technology in Computer Science, with hands-on experience in network security, vulnerability assessment, ethical hacking, and secure application development.

Technical Skills

Programming Languages: C, C++, Java, HTML, CSS, JavaScript, PHP, Python, Kotlin, Flutter

Cyber Security Tools: Nmap, Zenmap, Wireshark, Nikto, DVWA, SQLmap, Burp Suite, Metasploit Framework, Cisco Packet Tracer, OWASP WebGoat, Kali Linux

Development Tools: Git, GitHub, Android Studio, Visual Studio, Jupyter Notebook, Eclipse, Docker

Education

Bachelor of Technology in Computer Science

Gujarat Law Society University, Ahmedabad, Gujarat, India

Jun 2023 – Jun 2027

Current SGPA: 8.0/10.0

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Web Development, Computer Networks, Vulnerability Assessment and Penetration Testing, Cyber Attacks and Cyber Laws.

Professional Experience

Event Head — GLS ACM Student Chapter

Oct 2025 – Present

- Managed and coordinated a team of 50+ volunteers across multiple technical events, ensuring smooth execution and successful outcomes.
- Collaborated with organizing teams and volunteers to maintain effective communication, teamwork, and event coordination.

Projects

App Behaviour Monitoring System

Technologies: Android Studio, Kotlin, Android OS, Wireless ADB, Git, GitHub, Gradle

- Developed an Android-based security monitoring application to analyze application behavior without root access.
- Utilized Wireless ADB to securely collect and process system logs in real time.
- Implemented anomaly detection for suspicious activities, permission misuse, and potential data leakage.
- Generated real-time security alerts to enhance user awareness and device protection.

Safarnama – Travel Planner Website

Technologies: HTML, CSS, PHP, MySQL, XAMPP

- Developed a travel planning platform featuring destination discovery, travel packages, and online registration.
- Designed responsive and interactive web pages with multimedia content and modern UI elements.
- Implemented PHP backend services and MySQL database integration for user registration and data management.
- Built package management and newsletter subscription functionalities to improve user engagement.

- Collaborated in a team-based project while contributing to frontend development, backend integration, and database design.

Financial Market Risk Prediction

Technologies: Python, Streamlit, Scikit-learn, Pandas

- Developed a financial market risk prediction system using machine learning and ensemble learning techniques.
- Trained and evaluated Decision Tree, Random Forest, Logistic Regression, SVM, Bagging, Boosting, and Stacking models for risk classification.
- Built an interactive Streamlit dashboard for data visualization, model comparison, and real-time risk prediction.

Certifications & Achievements

- GLS University CTF Competition
- Java (Coursera)
- TroubleShoot Ideathon (2025)
- Volunteer Head, GLS ACM Student Chapter
- Active participant in Hackathons and CTF challenges

Additional Information

Availability: Open to Internships and Full-Time Opportunities

Languages: English (Fluent), Hindi (Fluent), Gujarati (Fluent)

Location: Open to Relocation
