PROFESSIONAL SUMMARY

Final-year CS undergraduate with hands-on experience building machine learning pipelines, NLP systems, and full-stack applications. Shipped production-grade projects spanning AI-powered platforms, text classification, and recommendation engines. Fluent in Python, Java, JavaScript, and SQL, with practical experience across REST APIs, OOP, Git, and Agile workflows.

EDUCATION

High School | Sakar English School, Ahmedabad, GJ Mar 2023
B.Tech — Computer Science & Engineering (AI/ML) | GLS University, Ahmedabad, GJ Aug 2023 – May 2027

PROJECTS

SecureU — Cybersecurity Audit & Compliance Tracker Jan 2024 – May 2024

Tech Stack: Python • NIST CSF / ISO 27001 / SOC 2 / GDPR / FERPA • Risk Analysis

- Engineered an automated compliance scoring engine covering 5 major frameworks (NIST CSF, ISO 27001, SOC 2, GDPR, FERPA), reducing manual audit time by an estimated 70% across 120+ security controls.
- Automated risk prioritization logic to flag critical control failures with severity scores, enabling faster remediation planning and cutting review cycles from hours to minutes.

Satellite Terrain Image Classifier Sep 2023 – Dec 2023

Tech Stack: Python • scikit-learn (Random Forest) • NumPy / pandas • OpenCV • PHP

- Developed a Random Forest classifier trained on a dataset of 5,000+ labeled satellite images (128×128 px) to identify terrain types (urban, forest, water, barren), achieving 92% validation accuracy.
- Implemented an OpenCV-based preprocessing pipeline including resizing, normalization, and histogram-based feature extraction, reducing inference time to under 200 ms per image.

Ahmedabad Eats — Restaurant Recommendation System Jan 2024 – Apr 2024

Tech Stack: React • Node.js • Express • JavaScript • Content-Based Filtering

- Developed a full-stack restaurant recommendation platform using React and Node.js/Express, enabling users to filter and discover restaurants across Ahmedabad from a curated dataset of 250+ listings.
- Designed a fully responsive UI and optimized Express API endpoints, reducing recommendation response time to under 300 ms and ensuring seamless performance across mobile and desktop devices.

TECHNICAL SKILLS

- Languages: Python, Java, C, PHP, HTML/CSS, SQL (MySQL)
- ML / AI: scikit-learn, TensorFlow/PyTorch (familiar), NumPy, pandas, Matplotlib, OpenCV, supervised learning, classification, regression, model deployment, data visualization
- Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Linux CLI, REST APIs, Docker (familiar), ETL pipelines
- Concepts: Data Structures & Algorithms, OOP, Machine Learning Pipelines, Database Design, Information Security
- Familiar With (learning): Docker, PyTorch, TensorFlow, cloud deployment, AWS/GCP basics

CERTIFICATIONS & TRAINING

- Green Skills and Artificial Intelligence — Skills4Future Program (NASSCOM / UNDP)
- Fundamentals of Java Programming — Board Infinity
- Software Engineering Job Simulation — JPMorgan Chase & Co.
- Technology Job Simulation — Deloitte
