📍 Ahmedabad, Gujarat-380013

PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student with a strong interest in software development, machine learning, and artificial intelligence. Passionate about building practical applications and continuously learning new technologies. Seeking an opportunity to apply technical knowledge, problem-solving skills, and a strong willingness to learn in a software engineering role.

TECHNICAL SKILLS

- **Programming Languages:** Python, C, SQL, HTML
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Recommendation Systems, Model Evaluation
- **Artificial Intelligence:** Natural Language Processing (NLP), Data Preprocessing, Feature Engineering
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, OpenCV, Tensorflow
- **Development Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code
- **Database Technologies:** MySQL

EDUCATION

Bachelor of Technology in Computer Science and Engineering
GLS University, Ahmedabad, Gujarat, India

2023 – 2027

- Current SGPA: 7.90 / 10.0
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Artificial Intelligence, Digital Image Processing, Compiler Design, Recommendation Systems.
- Building strong analytical, programming, and software development skills through academic coursework and projects.

PROJECTS

Object Detection For Blind People

Technologies: Python, Flutter, YOLOv8n, Tensorflow, Machine Learning

- Developed an AI-based mobile application that detects and identifies objects in real time using YOLOv8n and TensorFlow, helping visually impaired users navigate their surroundings more safely.
- Integrated a Flutter-based mobile interface with Python-based machine learning models to deliver fast and accurate object detection.
- Optimized the application for real-time performance and user-friendly interaction, ensuring fast object detection and a smooth mobile experience.

College Recommendation System

Technologies: JS, Python, CSS, HTML, Scikit-Learn

- Designed and developed a web-based College Recommender System that suggests suitable colleges across India based on user preferences and academic criteria.
- Built the application using Python, Scikit-learn, JavaScript, HTML, and CSS, implementing machine learning algorithms to generate personalized college recommendations.
- Developed an intuitive and responsive user interface, enabling users to easily explore and compare recommended colleges through a seamless web experience.

CERTIFICATIONS AND ACHIEVEMENTS

- **AWS Cloud Services** – Developed awareness of cloud technologies and their role in modern software development and scalable infrastructure.
 - **Green Skills and Artificial Intelligence** – learning the fundamentals of AI, sustainable technology practices, and responsible innovation.
 - Strengthened knowledge of AI concepts while understanding the importance of environmentally sustainable solutions in technology.
-

ADDITIONAL INFORMATION

Availability: Open to Internships and Full-Time Opportunities

Location: Open to relocate

Languages: Gujarati (Native), Hindi (Fluent), English (Basic)
