PROFESSIONAL SUMMARY

Final-year B.Tech Cybersecurity student with hands-on internship experience in VAPT, Web Application Penetration Testing, API Security, SIEM, and Digital Forensics. Identified and responsibly disclosed a real vulnerability on a live production web application during an authorized engagement. Seeking a Junior Penetration Tester or VAPT Analyst role to contribute to real-world offensive security operations.

EXPERIENCE

Cybersecurity Intern | Sophos & Hacker4help | June 2026

- Identified a vulnerability on a live production web application during an authorized assessment; documented full PoC with CVSS risk rating and responsibly disclosed to mentors
- Conducted OWASP Top 10 penetration testing on web apps and APIs using Burp Suite, OWASP ZAP, Nmap, and MobSF — covering SQLi, XSS, IDOR, and Broken Authentication
- Performed OSINT, recon, and authored VAPT reports with CVSS scores, PoC documentation, and remediation recommendations

TECHNICAL SKILLS

Offensive Tools : Burp Suite, Nmap, OWASP ZAP, Metasploit, SQLMap, MobSF, Nikto, Gobuster, Wireshark

Platforms : Kali Linux, WebGoat, TryHackMe, Docker

Programming : Python, C++, Bash

Security Concepts : OWASP Top 10, VAPT, API Security, Red Teaming, OSINT, Google Dorking, Digital Forensics, SIEM, AI Security

Threat Detection Reporting : CVSS Scoring, PoC Documentation, Risk Assessment, VAPT Report Writing

Version Control : Git, GitHub

PROJECTS

WebGoat Web Application Penetration Test | OWASP Top 10

Tools: Burp Suite, Docker, Kali Linux | [GitHub](#) | [Medium](#)

- Conducted full penetration test on OWASP WebGoat covering all A01–A10 categories — exploited SQLi, XSS, IDOR, SSRF, and Broken Access Control
- Produced structured VAPT report with PoC screenshots, CVSS severity ratings, and remediation steps — published on GitHub and Medium

RansomAware — Real-Time Ransomware Detection System | Python

Tools: Python, Watchdog, Psutil, Flask, SocketIO | [GitHub](#)

- Built detection engine using Watchdog + Psutil to monitor file system and process behaviour with automated process containment on breach
- Implemented ransomware family classifier (WannaCry, REvil, Petya, Ryuk, LockBit) with Flask + SocketIO dashboard and JSON forensic logging

EDUCATION

B.Tech — Computer Science Engineering (Cybersecurity)

GLS University, Ahmedabad | 2022 – 2026 | CGPA: 7.5

CERTIFICATIONS & ACHIEVEMENTS

Jr. Penetration Tester Path - TryHackMe (2026)

SC-900: Microsoft Security, Compliance & Identity (Microsoft)

Finalist — Odoo Hackathon (Top 100 across India)

Interests: CTF Challenges, Cybersecurity Research, Red Teaming
