📍 Ahmedabad, Gujarat, India 382424

PROFESSIONAL SUMMARY

Cyber Security undergraduate pursuing Computer Science and Engineering with Specialization in Cyber Security at GLS University. Passionate about network security and secure application development. Experienced with industry-standard security tools including Kali Linux, Burp Suite, Wireshark, Nmap, Metasploit, and SQLMap. Strong foundation in programming, networking, web security, and security analysis. Actively participates in Capture The Flag (CTF) competitions, cybersecurity challenges, and hackathons while continuously exploring emerging security threats and defensive techniques.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, PHP, SQL, Dart, HTML

Cyber Security Tools: Kali Linux, Burp Suite, Wireshark, Nmap, Metasploit Framework, SQLMap, Nikto, DVWA, OWASP WebGoat, Cisco Packet Tracer

Development Tools: Git, GitHub, Android Studio, Gradle, Cursor, Visual Studio, Anti-Gravity, Jupyter Notebook, Eclipse

EDUCATION

Bachelor of Technology in Computer Science

June 2023 – June 2027

Gujarat Law Society University, Ahmedabad, Gujarat, India

Current SGPA: 8.2/10.0

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Web Development, Computer Networks, Vulnerability Assessment and Penetration Testing, Cyber Attacks and Cyber Laws
- Actively engaged in government and college-level hackathons, demonstrating strong problem-solving and teamwork skills
- Proficient in Cyber Security with additional expertise in C, C++, Java, Linux Scripting, and SQL

PROFESSIONAL EXPERIENCE

Event Head

October 2025 – Present

GLS ACM Student Chapter

- Led multiple technical events, managing teams, volunteers, and execution end-to-end for 200+ students
- Coordinated with industry speakers and mentors, demonstrating strong leadership, communication, and event management skills
- Fostered technical community building and knowledge sharing among student members

PROJECTS

LendAHand – Google Solution Challenge 2025 (Team KARN)

Technologies: React, Node.js, Flutter, Firebase, PostgreSQL, Gemini APIs

- Led cross-functional team to build social impact platform connecting vulnerable populations with NGOs, shelters, and employment opportunities
- Architected responsive web frontend using React.js while coordinating parallel mobile app development in Flutter
- Implemented Node.js backend with PostgreSQL database and integrated Google's Gemini APIs for intelligent matching

- Managed project timeline, delegated tasks, conducted code reviews, and ensured seamless integration across platforms

App Behaviour Monitoring System

Technologies: Android Studio, Kotlin, Android OS, Embedded ADB, Git, GitHub, Gradle

- Developed a cybersecurity-focused Android application designed to monitor application behavior without requiring root access
- Leveraged Wireless ADB integration to access and analyze system logs securely
- Implemented AI-driven anomaly detection mechanisms to identify suspicious activities in real time
- Designed detection workflows for unauthorized permission usage, potential data leakage, sensor abuse, and abnormal application behavior
- Generated real-time security alerts to improve user awareness and mobile device protection

NutriTwin – AI-Powered Digital Health Twin

Technologies: Next.js, React, TypeScript, MongoDB, JWT, TailwindCSS, Docker, Google Cloud Run

- Developed an AI-powered digital health platform that creates personalized health profiles and nutrition plans
- Implemented health metric calculations including BMI, BMR, calorie targets, and obesity risk prediction
- Built secure authentication and health data management using JWT, bcrypt, and MongoDB
- Generated personalized meal plans, smart grocery lists, and lifestyle recommendations using AI-driven analysis
- Containerized and deployment-ready application using Docker and Google Cloud Run

Safarnama – Travel Planner Website

Technologies: HTML, CSS, PHP, MySQL, XAMPP

- Developed a travel planning platform featuring destination discovery, travel packages, and online registration
- Designed responsive and interactive webpages with multimedia content and modern UI elements
- Implemented PHP backend services and MySQL database integration for user registration and data management
- Built package management and newsletter subscription functionalities to improve user engagement
- Collaborated in a team-based project while contributing to frontend development, backend integration, and database design

CERTIFICATIONS AND ACHIEVEMENTS

- Google Solution Challenge 2025 – Participant (submitted LendAHand social impact platform)
- EVENT HEAD, GLS ACM Student Chapter – Leading technical community of 200+ students
- Active participant in Hackathons and CTF challenges

ADDITIONAL INFORMATION

Availability: Open to Internships and Full-Time Opportunities

Location: Open to relocation

Languages: English (Fluent), Hindi (Fluent), Gujarati (Fluent)
