CAREER OBJECTIVE

Computer Science (AI/ML) undergraduate with hands-on experience building ML models, NLP, and DL systems, and fullstack applications across hackathons and independent projects. Seeking to contribute this experience to a fast-moving industry and engineering team, building AI-driven solutions that solve real business problems and ship value quickly. Eager to keep learning on the job and grow into a stronger engineer while delivering consistent, measurable impact.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML), FET, GLS UNIVERSITY Ahmedabad, Gujarat
CGPA: 8.8+ 08/2023-05/2027

EXPERIENCE

AI Dev Intern – GlobalVox Ventures Pvt. Ltd. Ahmedabad, Gujarat
Apr 2026 – Present

- Developing AI-powered applications for real-world business use cases
- Building scalable systems and automation solutions

PROJECTS:

Global Tender Discovery Platform May 2026 - Present
Python, Playwright, FastAPI, Next.js, Firecrawl

- Crawled multiple government tender sites directly, bypassing third-party aggregators using Firecrawl and AI model APIs
- Filtered listings by semantic meaning, not just keyword matching, cutting manual research effort

PixGuard AI Nov 2025 - Present
Chrome Extension, ML, Agentic AI, Computer Vision, JavaScript

- Detected faces on-device and applied pixel changes to protect privacy, causing deepfake attempts to misfire
- Embedded a verification ID in the pixels so the platform can confirm the image is already secured

Chandas Identifier Nov 2025 - Present
NLP, Machine Learning

- Segmented verses into laghu/guru syllable patterns using classical prosody rules, then classified meters with ML
- Traced every prediction back to its syllable pattern, helping scholars and philosophers study classical texts

Personalized Tourism Recommendation System Jul 2025 - Present
Machine Learning, Web App

- Turned user preferences, budget, mood, location, and trip duration into itineraries via an ML engine and route optimization
- Trained the model on a filtered 10-state dataset, cutting manual planning time and surfacing hidden gems

TECHNICAL SKILLS

- AI Tools:** Claude pro, Antigravity, ChatGPT, Lovable, Codex, Gemini Pro, Crew
- ML & Data Science:** Data Cleaning, EDA, Model Building, Evaluation
- Languages:** Python, SQL, Java
- Backend & Web:** FastAPI, HTML, CSS, JavaScript
- Database:** PostgreSQL, MySQL
- Core CS:** Data Structure & Algorithms, OOP, Operating Systems, DBMS, Computer Networks
- Tools:** Git, Github, Jira, Bitbucket, Jupyter, Colab

ACHIEVEMENTS & LEADERSHIP

- Vice Chairperson – GLS ACM Student Chapter - Organized technical events, workshops, and hackathons **2025–2026**
- Finalist - Smart India Hackathon 2025 Dec 2025
- Finalist – Genesis Hackathon (OxGenIgnite), NIT Goa Oct 2025
- 2nd Position – Poster Presentation (Digital Twin), GLS Cybershadez’25 Mar 2025
