vrundjoshi5@gmail.com | +91 63520 96251 | Ahmedabad,Gujarat | [GitHub](#) | [LinkedIn](#)

PROFILE

Computer Science & Engineering student with an interest in web development.

TECHNICAL SKILLS

- **AI Tools:**
Antigravity , ChatGPT
 - **Core Concepts:**
OOP , Basic DSA
 - **Programming Language:**
Python , Java , C++
 - **Web:**
HTML , CSS , Basic JS
 - **Database:**
MySQL
 - **Development Tools:**
Git , Github and Jupyter noteboke
-

LANGUAGE

- Gujarati (Native)
 - Hindi (Fluent)
 - English (Fluent)
-

INTERESTS

- Web Development
- Cricket
- Traveling

EDUCATION

- **GLS University, Ahmedabad** 2023-2027
B.Tech in Computer Science & Engineering | CGPA : 7.18
 - **Murlidhar Vidhyalaya , Satrampur** 2022-2023
HSC(Class XII) | Percentent : 48.31 %
 - **Adarsh Vidhyalaya , lunawada** 2020-2021
SSC(Class X) | Percentage : 76.33 %
-

PROJECTS

Deepfake Detection | [GitHub](#)

- Developed a CNN-based web application using Python, TensorFlow, OpenCV, and Flask to detect AI-generated (deepfake) images with real-time prediction through a user-friendly interface.

Car Recommendation System | [GitHub](#)

- Developed a Car Recommendation System using Machine Learning to recommend suitable cars based on user preferences such as budget, fuel type, transmission, and brand.
- Built a user-friendly web application with Python, Flask, HTML, and CSS, using Pandas for data preprocessing and Scikit-learn for the recommendation model to provide personalized car suggestions.

Online Ticket Booking System | [GitHub](#)

- A Ticket Booking System is a software application that allows users to search for available tickets, select seats, make bookings, and receive booking confirmation. It can be used for buses, trains, flights,
-

CERTIFICATES

- Introduction to Java — LearnQuest, Coursera
- How to create a Jira SCRUM project
