

SHIV MEHTA

AI / ML ENGINEER

Ahmedabad, Gujarat, India | +91 7990584463 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

B.Tech, Computer Science & Engineering — GLS University, Faculty of Engineering and Technology, Ahmedabad

2023 – 2027 | CGPA: 8.36 / 10

12th (CBSE) — White House Public School, Bhuj 2022 – 2023 | Percentage: 82.8%

10th (CBSE) — White House Public School, Bhuj 2020 – 2021 | Percentage: 93.8%

TECHNICAL SKILLS

Languages: Python, SQL, HTML

Database: MySQL

Core Concepts: Object-Oriented Programming (OOPs), Database Management Systems (DBMS)

Libraries: Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn

Frameworks: LangChain, Streamlit

Deployment: Streamlit Cloud, Render

MLOps & Tools: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS

Student Performance Predictor — Supervised Learning | Python, Scikit-learn, Pandas, NumPy, Streamlit

Live Demo: [student-performance-application.streamlit.app](#) GitHub: [github.com/Shivmehta04/student-performance-app](#)

- Built and deployed an end-to-end supervised ML pipeline predicting student academic performance from demographic and study-habit features with a tuned Random Forest Classifier.
- Designed a preprocessing pipeline (missing-value imputation, categorical encoding, feature scaling) to convert raw survey data into model-ready inputs.
- Trained and benchmarked multiple models (Linear Regression, Decision Tree, Random Forest) to select the highest-performing algorithm.
- Deployed a real-time prediction interface on Streamlit Cloud with an interactive web UI and personalised study recommendations.

Sentiment Analyzer — Natural Language Processing | Python, NLP, Scikit-learn, Streamlit

Live Demo: [sentiment-analyzer-project-nlp.streamlit.app/](#) GitHub: [github.com/Shivmehta04/sentiment-analyzer](#)

- Developed a 3-class NLP text classification system (Positive / Negative / Neutral) using TF-IDF vectorization and Logistic Regression.
- Built a full NLP preprocessing pipeline — tokenization, stop-word removal, lemmatization, and TF-IDF feature extraction.
- Compared multiple classifiers (Logistic Regression, Naive Bayes) selected by macro F1-score; deployed live inference app on Streamlit Cloud.

Customer Segmentation Dashboard — Unsupervised Learning | Python, Scikit-learn, K-Means, PCA, Streamlit

Live Demo: [customer-segmentation-project-0.streamlit.app](#) GitHub: [github.com/Shivmehta04/customer-segmentation](#)

- Built an unsupervised ML web app segmenting 200 customers into 5 distinct behavioral groups using K-Means Clustering on income and spending-score features.
- Applied Elbow Method and Silhouette Score to determine optimal K=5; used PCA for dimensionality-reduced cluster visualization.
- Translated clusters into 5 actionable business segments (e.g., Premium Customers, Budget-Conscious) with tailored marketing recommendations per segment.
- Deployed an interactive Streamlit dashboard with real-time segment prediction, confidence scoring, and visual analytics (scatter plots, segment-distribution charts).

CERTIFICATIONS & ACHIEVEMENTS

- Foundations of AI — 7-Day Workshop Certificate, Green Skill Initiative (AICTE × Shell India × Edunet Foundation)
- 1st Prize, Cyber Shadez Inter-College Treasure Hunt Competition — GLS University | February 2026
- Participant, Adani Hackathon — Hack Innovate 2026, AI & Operations Research Domain
- Merit-Based Scholarship (₹45,495), GLS University — awarded for academic excellence in Class 12 (CBSE)
