CAREER OBJECTIVE

Final-year B.Tech CSE (AI/ML) student with hands-on experience in Python backend development using Django, Django REST Framework, and Flask. Seeking an opportunity to apply my skills in REST API development, databases, problem solving, and AI-integrated applications while learning and contributing in a fast-paced engineering environment.

EXPERIENCE

Python Developer Intern

Dec. 2025 – Jan. 2026

Infosys Springboard 6.0

Remote

- Developed an **AI-integrated quiz platform** using Python, Django, React.js, SQLite, Tailwind CSS, REST APIs, and LLM APIs to generate personalized quizzes from study material.
- Implemented backend APIs, database models, frontend-backend integration, testing, Git-based collaboration, and deployment workflows.
- Tested and debugged backend functionality, validated API responses, and contributed to application integration and deployment.

PROJECTS

ReturnReady – Shared Rental Inspection Platform

GitHub

Jul. 2026 – Present

React.js, Node.js, Express.js, MongoDB

- Developing a MERN-based platform to reduce landlord-tenant disputes by documenting property conditions, inventory damage, missing items, and security-deposit deductions.
- Implementing room-wise inspections, timestamped photo evidence, inventory tracking, move-in/move-out comparisons, digital sign-off, and downloadable PDF reports.

Netra – AI-Driven Data Processing Platform

GitHub

Aug. 2025 – Apr. 2026

React, TypeScript, Vite, Django REST Framework, JWT, Pandas, Scikit-learn, Axios

- Solved manual data preparation using an AI-powered platform built with React, Django, Pandas, and Scikit-learn.
- Automated preprocessing, feature engineering, and ML workflows using Groq AI.
- Developed secure JWT-based REST APIs for seamless dataset management and analysis.

GreenChoice – AI-Powered Browser Extension

GitHub

Jan. 2025 – Feb. 2026

JavaScript, HTML/CSS, Python (Flask), REST APIs, Web Scraping

- Built an AI-powered Chrome extension for real-time sustainability analysis and eco-friendly product recommendations.
- Integrated Manifest V3, JavaScript content scripts, and Flask REST APIs for product extraction, scoring, and comparison.
- Implemented web scraping, heuristic ranking, caching, debouncing, and lazy loading to improve recommendation quality and performance.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++

Backend: Django, Django REST Framework, Flask, Node.js, Express.js, REST APIs, JWT, LLM API Integration

Frontend: React.js, HTML5, CSS3, JavaScript, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Database Design

AI/ML: Pandas, Scikit-learn, Machine Learning, Data Preprocessing, Model Evaluation

Core Concepts: Data Structures, Object-Oriented Programming, DBMS, Problem Solving

Tools & Platforms: Git, GitHub, Docker, Linux, Vercel,Render, VS Code, Eclipse

SOFT SKILLS

Communication | Attention to Detail | Work Ethic | Teamwork

EDUCATION

B.Tech. in Computer Science & Engineering – CGPA: 8.7/10 (Till Sem 6)

2023 – 2027

GLS University, Specialization in AI/ML

Ahmedabad, Gujarat

CERTIFICATIONS & ACHIEVEMENTS

- First Prize – Gujarat Innovation Showcase 2026
- Oracle Cloud Infrastructure Data Scientist Professional
- Career Essentials in Generative AI – Microsoft & LinkedIn
- Tata Group Data Analytics Job Simulation – Forage
- Foundation course on GreenSkill and Artificial Intelligence – Edunet Foundation
