

ARYAN PATEL

Data Analyst | Computer Science Undergraduate

7383772611 | arianpatel261104@gmail.com | <https://www.linkedin.com/in/aryan-patel-3b243837a/>

EDUCATION

Gujarat Law Society, Ahmedabad

Jun 2023 – Expected May 2027

Bachelor of Technology in Computer Science

Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Database Management, Artificial Intelligence

TECHNICAL SKILLS

Databases & Cloud: Firebase Realtime DB/Firestore, Google Cloud Platform, Docker, Supabase

AI / ML & Data: TensorFlow, Pandas, NumPy, OpenCV, Computer Vision, Stable Diffusion

Tools & Workflow: Git/GitHub, VS Code, Eclipse, Android Studio

Languages: Java, Python, C/C++, JavaScript

FEATURED PROJECTS

AdhiKaar: Government Scheme AI Matcher

Sep 2025 – April 2026

Flutter, Python (Flask), Supabase, FAISS, NLP | Final Year Capstone Project

- Built a full-stack mobile platform (Flutter front end, Python backend, Supabase) featuring an AI semantic search engine (FAISS, SBERT) to accurately match citizens with relevant welfare schemes using natural language queries.
- Integrated a secure Cloud Document Vault and real-time OTP authentication via Supabase, allowing users to safely store verification documents and seamlessly track application statuses.
- Designed a dynamic, interactive mobile interface that calculates a personalized "Profile Strength" metric based on demographic data, directly optimizing the accuracy of AI-driven scheme recommendations.

Sanskrit Retrieval Enhancement Through Deterministic Linguistic Processing

Sep 2026 – Present

Flutter, Python (Flask), Supabase, FAISS, NLP | Final Year Capstone Project

- Built a **Sanskrit-aware retrieval engine** using deterministic linguistic processing for **Sandhi, inflectional variation, Samasa, and Unicode normalization**, enabling search across lexical forms that differ from corpus surface forms.
- Engineered a **dual-representation indexing architecture** that separates normalized search representations from immutable source text, providing **traceable mappings from query → linguistic analysis → indexed form → original passage** without altering published Sanskrit content.
- Developed an **end-to-end retrieval evaluation framework** benchmarking baseline keyword search against enhanced linguistic retrieval across **Precision, Recall, F1, and ranking metrics**, with reproducible datasets and linguistic error analysis.

VIRTUAL EXPERIENCE

Data Analyst Job Simulation — Deloitte Australia (via Forage)

Nov 2025

- Classified and cleaned a large dataset in Excel to prepare it for stakeholder-ready analysis on a simulated forensic technology case.
- Built an interactive Tableau dashboard to visualize key findings and translated the analysis into actionable business recommendations.

CERTIFICATIONS

Foundation Course on Artificial Intelligence and Green Skills

Feb 2026

Edunet Foundation, Shell India & AICTE
