EDUCATION

GLS University (Faculty of Technology & Engineering), Ahmedabad B.Tech. (Computer Science & Engineering Current CGPA: 8.31	2023-Present
Edunova Higher Secondary School, Ahmedabad Higher Secondary Percentage: 63.07%	2022-2023
Divine Buds English School, Ahmedabad Secondary Percentage: 74.82%	2020-2021

TECHNICAL SKILLS

- **Languages & Core:** C, C++, Java, Python, Data Structure & Algorithm
- **Web Technologies:** HTML, CSS, JavaScript, React.js, FastAPI
- **Database:** MySQL, SQL, PostgreSQL
- **Artificial Intelligence:** Machine Learning, Natural Language Processing(NLP), Recommender System
- **Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, OpenCV, Matplotlib, TensorFlow
- **Tools & Platform:** GitHub, VS Code, Eclipse, Jupyter Notebook

PROJECTS

FEMWELL – AI-Powered PCOS Prediction & Personalized Wellness Platform [GitHub](#)

- Developed a full-stack AI-powered PCOS platform with 5 integrated modules for prediction, symptom tracking, personalized recommendations, chatbot support, and awareness.
- Trained and evaluated a Logistic Regression model on a dataset of 500 patient records using 10 clinical features, achieving 84.0% accuracy, 88.4% AUC-ROC, and 72.9% F1-score.
- Built FastAPI REST APIs with PostgreSQL and OpenRouter API integration for real-time predictions, personalized recommendations, and chatbot responses.

Tech Stack: Python, Machine Learning, React.js, FastAPI, PostgreSQL, OpenRouter API

Classify News Articles as Fake or Real

- Built an NLP-based fake news detection system using TF-IDF vectorization and evaluated 5 Scikit-learn classifiers.
- Preprocessed thousands of news articles through tokenization, stop-word removal, and feature extraction.
- Evaluated multiple ML models to improve text classification performance.

Tech Stack: Python, NLP, Machine Learning

Flappy Bird Game [GitHub](#)

- Developed a Flappy Bird game in Java using Swing and AWT, implementing real-time gameplay with gravity physics, random obstacle generation, and score tracking.
- Implemented collision detection, keyboard event handling, and a 60 FPS game loop using Java Timer to deliver smooth gameplay and animations.
- Applied object-oriented programming (OOP) principles by modeling game entities through dedicated Bird and Pipe classes, improving code organization and maintainability.

Tech Stack: Java, Swing, AWT, OOP

CERTIFICATIONS

Deloitte Data Analytics Job Stimulation - Forage	2026
Green Skills And Artificial Intelligence - Edunet Foundation	2025
Fundamentals of Java Programming - Coursera	2024

HACKATHONS

Participated in HackNUthon 6.0, a 48-hour national hackathon at Nirma University.	2025
