PROFILE SUMMARY

Final-year B.Tech Computer Science student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in computer vision, recommendation systems, and AI chatbot development. Skilled in Python and machine learning libraries, with a passion for building intelligent systems that solve real-world problems.

EDUCATION

GLS University

B.Tech in Computer Science & Engineering

Ahmedabad, Gujarat

2023 – Ongoing

Arpan International School

XII (Guj-Board) – 60.03% | X (Guj-Board) – 95.86%

2021 – 2023

TECHNICAL SKILLS

Languages: Python, Java, PHP, JavaScript, Dart, Shell

Web & Backend: HTML, CSS, Flask, FastAPI, Tailwind CSS

AI/ML: Scikit-learn, YOLOv11, Depth Anything V2, Computer Vision

Libraries: Pandas, NumPy, OpenCV

Database: MySQL

Tools: Git, GitHub, Google Colab, VS Code, Jupyter Notebook, Linux

PROJECTS

AI Chatbot for Gift City | Python, Flask, NLP

SSIP Hackathon

- Built a Flask-based chatbot with NLP (spell correction, fuzzy matching, synonym handling) and multilingual support for English, Hindi, and Gujarati.
- Covered smart city domains hospitals, restaurants, malls, and gardens providing a unified information assistant for GIFT City.

FixMyRoad | Python, YOLOv11, Depth Anything V2, Computer Vision

Capstone Project

- Built a road damage analysis system using YOLOv11 segmentation model to detect and precisely segment potholes from images and video feeds.
- Integrated Depth Anything V2 for monocular depth estimation to measure pothole depth, enabling accurate repair material cost estimation for smart city maintenance.

YouTube Video Recommendation System | Python, Scikit-learn, Pandas

- Content-based recommendation system using TF-IDF vectorization and cosine similarity on video metadata to generate Top-K suggestions.
- Incorporated user behavior weighting (likes, shares, watch time, dislikes, skips), recency decay, and category preference boosting to personalize results.
