EDUCATION

GLS University

Bachelor of Technology in Computer Science Engineering

JUL 2023 – JUL 2027

Ahmedabad, Gujarat

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Operating Systems
- Database Management System (DBMS)
- Computer Networks
- Web Development

PROJECTS

SOAR Platform – Security Orchestration, Automation & Response

- Built a **Security Automation Platform** as part of a 4-member capstone team, automating detection and response for **Brute Force**, **Phishing**, **Malware**, and **Network Anomaly** attacks.
- Designed automated **response playbooks** and led integration of **Threat Intelligence APIs** (VirusTotal, AbuseIPDB, AlienVault OTX, MalwareBazaar) for real-time IOC enrichment.
- Built a **risk-scoring engine** aligned with the **MITRE ATT&CK** framework and **NIST SP 800-61** incident response guidelines.
- Engineered backend services with **FastAPI**, **PostgreSQL**, **Redis**, and **Celery**; built the frontend with **React 19**, **Vite**, and **TailwindCSS**.

Stock Trading Platform

- Built a **Full-Stack Web Application** simulating **Real-Time Stock Trading** and **Portfolio Management**, inspired by Zerodha, with **Live Market Data Integration** and **Order Placement** (Buy/Sell).
- Integrated **Charting and Analytics** features to visualize **Stock Trends**, **Performance**, and **Historical Data**.
- Built a responsive frontend with **ReactJS** & **TailwindCSS**, backend REST APIs using **Node.js** & **Express**, and database management with **MongoDB**; focused on secure transactions and modular, scalable API design.

Video Conferencing Platform

- Built a **Full-Stack Web Application** enabling **Real-Time Video Conferencing**, inspired by platforms like Zoom, with **User Authentication**, **Meeting Scheduling**, and **Secure Room Creation** via unique meeting IDs.
- Integrated **WebRTC** and **Socket.IO** for real-time **Video**, **Audio**, and **Chat Communication**.
- Built a responsive frontend using **ReactJS** & **TailwindCSS**, with backend APIs in **Node.js** & **Express**, and data storage in **MongoDB**; optimized for **Low Latency** and **Scalability** across multi-user calls.

TECHNICAL SKILLS

Languages: C, Python, Java, JavaScript

Frameworks: Express.js, React.js, Node.js, FastAPI, TailwindCSS

Databases: MongoDB, MySQL, PostgreSQL, Redis

Security & Networking: MITRE ATT&CK Framework, NIST SP 800-61 (Incident Response), Threat Intelligence Platforms (VirusTotal, AbuseIPDB, AlienVault OTX, MalwareBazaar), Networking Fundamentals (CompTIA Network+ coursework)

Tools: Git, GitHub, VS Code, Postman, Linux/CLI, Jupyter Notebook

CERTIFICATIONS & TRAINING

Certifications: Fundamentals of Java Programming – Coursera; Full Stack Development – Apna College

Hands-on Practice: TryHackMe (Linux & Security Fundamentals rooms), PortSwigger Web Security Academy (Web App Security, SQL Injection, XSS), OverTheWire Bandit (Linux/CLI Fundamentals)
