SUMMARY

AI/ML-focused Computer Science undergraduate with hands-on experience building production-grade ML systems, LLM-powered applications, and full-stack platforms. Top 50 of 630+ teams at VOIS Innovation Marathon 2.0. Seeking an AI/ML Engineer role to apply expertise in predictive modeling, NLP, and end-to-end system design.

TECHNICAL SKILLS

AI/ML: Scikit-learn, XGBoost, Pandas, NumPy

Backend: Python, Java, PHP, C++

Frontend: React.js, JavaScript, HTML, CSS, Figma

Databases: MongoDB, MySQL

Tools: Git, REST APIs, JWT, Shell, Pearl, MS Office

PROJECTS

PS Fitness — AI-Powered Health & Wellness Ecosystem

Oct 2023 – Present

[React.js](#) · [FastAPI](#) · [MongoDB](#) · [Google Gemini 2.5 Flash](#) · [XGBoost](#) · [Chart.js](#)

- Built end-to-end AI wellness platform integrating Gemini 2.5 Flash multimodal coaching, XGBoost fitness plan classification (5-fold CV), and async FastAPI backend with custom in-memory cache achieving 0.00s nutritional search latency.
- Implemented XP-based gamification with streak tracking to drive long-term habit formation; built interactive Chart.js dashboards for sleep, recovery, and caloric trend visualization.

GarudaRush — ML-Enhanced DDoS Detection System

Capstone Project

[React 18](#) · [Flask](#) · [MongoDB](#) · [PyShark](#) · [Scikit-Learn](#) · [JWT](#)

- Engineered DDoS detection system using Random Forest (20+ network flow features) with PyShark live packet capture and a hybrid ML + rule-based engine detecting SYN, UDP, Slowloris, and DNS Amplification attacks.
- Optimized MongoDB indexing for high-frequency traffic logs enabling sub-second query performance; built glassmorphism React dashboard with live telemetry charts and automated alert workflows.

PhishScan — Chrome Extension for Phishing Detection

Security Tool

[JavaScript ES6+](#) · [Chrome Extensions API MV3](#) · [VirusTotal API](#) · [Google Safe Browsing API](#)

- Developed Chrome Extension (MV3) using VirusTotal + Google Safe Browsing APIs for real-time phishing detection with automated URL expansion for shortened links (bit.ly, t.co) before user interaction.

HACKATHONS & COMPETITIONS

- VOIS Innovation Marathon 2.0 — Ranked Top 50 out of 630+ teams nationally (Sep 2025 – Feb 2026)
- Smart India Hackathon (SIH) — Built VayuTrack: real-time AQI monitoring with pollution source tracking and predictive insights for citizens and policymakers
- AIT Hackathon — Developed an AI-powered Study Content Converter (debut hackathon)

EDUCATION

B.Tech in Computer Science & Engineering — GLS University, Ahmedabad

2023 – 2027 (3rd Year)

Certification: Foundation Course on Green Skills & Artificial Intelligence — Skills4Future Program (NASSCOM)

Languages: English | Hindi | Gujarati
