PROFESSIONAL SUMMARY

Enthusiastic and dedicated Computer Science & Engineering student with strong knowledge of C++, Java, Python, MySQL, and Web Development technologies. Skilled in object-oriented programming, data structures, and problem-solving with a passion for learning emerging technologies such as Artificial Intelligence and Machine Learning.

TECHNICAL SKILLS

Languages & Core: C, C++, Java, Python, PHP, Object-Oriented Programming, Data Structures & Algorithms
Web & Mobile Development: HTML5, CSS3, JavaScript, Flutter, Dart
Database: MySQL, SQL, PostgreSQL, DBMS, Supabase
Artificial Intelligence & Machine Learning: Artificial Intelligence, Machine Learning, Recommender Systems
Tools & Platforms: Git, GitHub, VS Code, Supabase, Eclipse IDE, Android Studio
Cloud Technologies: AWS Cloud Fundamentals

PROJECTS

- SyncVue SCM: AI-Driven Supply Chain Management Platform**

Team Size: 4 | Jul 2025 - Apr 2026

Technologies: Flutter, Dart, FastAPI, Supabase, Python, AI/ML, Prophet, Matplotlib

 - Developed an AI-powered supply chain management system for SMEs featuring inventory tracking, order management, demand forecasting, predictive restocking, and sales analytics to enhance supply chain efficiency and business decision-making.
- Online Course Recommendation System**

Team Size: 2 | Apr 2026

Technologies: Python, Streamlit, NLP, Recommender Systems, Web Scraping

 - Developed an Online Course Recommendation System using Python, Streamlit, and machine learning to provide personalized course suggestions through content-based filtering and web-scraped course data.
- Smart Electricity Consumption Analyzer**

Team Size: 1 | July 2025

Technologies: Python, Streamlit, Pandas, NumPy, Plotly, Data Visualization

 - Developed a Streamlit-based application for appliance-wise energy monitoring, electricity bill estimation, carbon footprint calculation, and interactive consumption analytics.
- Fruit Ninja Game**

Team Size: 2 | Nov 2024

Technologies: Java, Swing, AWT, OOP, Event Handling

 - Developed a Java-based Fruit Ninja game featuring real-time fruit slicing, score management, bomb detection, and interactive GUI using Swing and AWT.
- Used Car Price Prediction System**

Team Size: 1 | March 2026

Technologies: Python, pandas, numpy, Scikit-learn, Matplotlib, Machine Learning Algorithms

 - Developed a machine learning-based system to predict used car resale prices using data preprocessing, feature engineering, ensemble learning techniques and regression models to achieve accurate price predictions.

CERTIFICATIONS, WORKSHOPS & TRAININGS

- Green Skills and Artificial Intelligence Workshop - Skills4Future, Edunet | July 2025
- Hour of AI - GLS University | Dec 2025
- AWS Cloud Seminar - GLS University | Jan 2026
- Fundamentals of Java Programming - Board Infinity, Coursera | Oct 2024
- Introduction to Artificial Intelligence - IBM SkillsBuild | May 2025
- PostgreSQL : Become an SQL developer - Simplilearn | Jan 2026

EDUCATION

B.Tech in Computer Science & Engineering GLS University, Ahmedabad	CGPA: 8.22 / 10	2023-2027
XII (GSEB) Divan BalluBhai High School, Ahmedabad		2023
X(GSEB) Divan BalluBhai High School, Ahmedabad		2021
