

DIVYA SHARMA

(+91) 9723022229 | writetodivya02@gmail.com | github.com/DivyaSharma02 | linkedin.com/in/DivyaSharma77

TECHNICAL SKILLS

Languages and Core: C++, C, Java, Python, Data Structures, Algorithms, OOP

Web & Frameworks: HTML5, CSS3, JavaScript, Flutter

AI/ ML/ Data: Artificial Intelligence, Machine Learning, Recommender Systems, SQL, DBMS

Tools and Platforms: Git, GitHub, VS Code, Eclipse, Android Studio, Supabase

EDUCATION

Computer Science and Engineering | GLS University, Ahmedabad (CGPA: 8.4/10) | 2023 - Present
XII (CBSE) | Prakash Higher Secondary School, Ahmedabad (79.8%) | 2023
X (CBSE) | Prakash Higher Secondary School, Ahmedabad (84.2%) | 2021

PROJECTS

SyncVue SCM: AI-Driven Supply Chain Management Platform Jul 2025 - Apr 2026

Technologies: Flutter, Dart, Python, FastAPI, Supabase, Matplotlib, Prophet, Google Gemini API, Scikit-learn, AI/ML

- Developed a cross-platform supply chain management solution using Flutter and FastAPI to streamline supply chain operations for companies and distributors, reducing manual tracking inefficiencies for grocery-based SMEs.
- Integrated ML models (Prophet, Scikit-learn) to enable predictive restocking, automated demand forecasting, and K-Means hyperlocal clustering, while integrating the Google Gemini API to power an assistant for general support and user queries.

NewsRadar: Smart News Finder Apr 2026

Technologies: Python, HTML5, CSS3, Streamlit, Web Scraping, Recommender Systems, Machine Learning, NLP

- Developed an interactive semantic news discovery application built using Python and Streamlit, implementing real-time web scraping with BeautifulSoup to dynamically aggregate headlines across multiple global news outlets.
- Engineered an NLP text processing and recommendation pipeline utilizing NLTK and Scikit-learn (TF-IDF Vectorizer and Cosine Similarity) to clean unstructured text data and instantly rank and recommend top matching articles based on user query relevance.

Land Cover Classification Jul 2025

Technologies: Python, TensorFlow, Streamlit, Convolutional Neural Networks (CNN), Plotly, NumPy, Pandas, Data Visualization, Computer Vision.

- Developed an AI-powered Environmental Monitoring System utilizing a deep learning CNN model in TensorFlow to accurately classify satellite imagery into four land cover categories (Cloudy, Desert, Green Area, Water).

FitFolio: A Myntra HackerRamp Project Jun 2024 - Jul 2024

Technologies: HTML5, CSS3, JavaScript, UI/UX Design, Product Ideation, Gamification

- Designed 'Fashion Boards,' an engagement-driven feature concept featuring gamified rewards, collaborative tools, and upcycling initiatives to boost platform retention and community participation.

CERTIFICATIONS & WORKSHOPS

- Make Agentic AI Work for You | IBM SkillsBuild Jun 2026
- Green Skills and Artificial Intelligence Workshop | Skills4Future, Edunet Jul 2025
- Fundamentals of Artificial Intelligence | IIT Guwahati, NPTEL Jul 2024 - Oct 2024
- Introduction to Java | LearnQuest, Coursera Sep 2024

ACHIEVEMENTS

- Finalist** | Smart India Hackathon (SIH) 2025 (National-level hackathon)
- 1st Place** | Code Relay, Cyber Shadez 2025 (GLS University tech fest)
- Phase-1 Qualifier** | Myntra HackerRamp 2024 (National hackathon)
- 3rd Place** | GLS University Hackathon 2024 (University-wide competition)
