SUMMARY

B.Tech Computer Science student (Sem VII, GLS University) working across Python, Flutter, Laravel, and FastAPI. Focused on the gap between ML theory and things that actually run in production — most projects sit somewhere in that space, from ML-backed detection pipelines to full-stack apps with an AI layer.

EXPERIENCE

Software Development Intern | SGFTech (Remote) May 2026 – Present

- Design and implement scalable features across mobile and web applications.
- Work with Claude Code, subagents, and agentic workflows as part of the day-to-day dev process.
- Collaborate with the team on build, test, and release cycles for product features.
- Apply problem-solving and programming skills to real production tasks, not just coursework.

Laravel Developer Intern | Artisanal Byte Jun 2025 – Aug 2025

- Built UnmuteMe, a mental-health app, full-stack with Laravel, Vue.js, and Inertia.js, with AI features powered by Gemini.
- Worked under mentorship of Bhavil Jain; first production internship, and a real introduction to the gap between code that works and code that ships.

SELECTED PROJECTS

FlowState | Flutter · Supabase · Gemini 2.5 Flash · Riverpod 2026

- Task manager app aimed at AuDHD users — built around focus rather than pure feature count.
- Flutter frontend, Supabase backend, Edge Functions that call Gemini for AI-driven task suggestions.
- Still in progress; the hardest design problem has been reducing friction, not adding options.

IncidentLens | Python · Flutter · Gemini Vision API · FastAPI · Firebase 2026

- Watches live camera feeds with Gemini Vision to detect falls, fights, fire, smoke, and unconscious persons in real time.
- Dispatches alerts to staff in under 5 seconds and generates plain-language responder briefs; built for Google Solution Challenge.

PocketDocs | Python · FastAPI · LangChain · FAISS · Claude API 2026

- Local-first RAG system for document Q&A — user-isolated PDF collections with inline page citations.
- Hybrid FAISS + BM25 retrieval with a cross-encoder reranker for higher-precision answers.

ASLDetector | Python · PyTorch · YOLOv8 · Gradio 2026

- Real-time American Sign Language alphabet detector; fine-tuned YOLOv8n/s on the Roboflow ASL Letters dataset (26 classes).
- Benchmarked accuracy vs. speed across model sizes (YOLOv8s: 0.966 mAP50).

PlacementBot | Python · Scikit-learn · XGBoost · SHAP · FastAPI 2026

- End-to-end placement prediction pipeline: EDA, feature engineering, LR/RF/XGBoost comparison, SHAP explainability.
- Real 50k-row dataset with honest metrics reporting and a CI pipeline.

QR Sentinel | Python · Scikit-learn · FastAPI · Flutter 2026

- Built a malicious-URL detection system behind QR codes; trained four models (LR, RF, SVM, XGBoost) on 10,000+ URLs with PhishTank integration.
- Logistic Regression gave the best accuracy; deployed via FastAPI + Flutter Web for real-time QR scan analysis.

AutoOps 3.5 | Python · Google Antigravity SDK · Gemma 2 · GCP (Cloud Run, Pub/Sub, Firestore) 2026

- Autonomous multi-cloud incident mitigation engine; built for a Google Agentic AI hackathon.

- Event-driven agent intercepts infra alerts via Pub/Sub, validates remediation actions with a Gemma 2 guardrail (confidence scoring), and executes fixes like service rollback and deadlock clearing.
- Persists full incident audit trail to Firestore; deployed on Cloud Run.

SKILLS

Languages: Python, Dart, PHP, JavaScript, Java, C++, TypeScript

Frameworks: Flutter, FastAPI, Laravel, Vue 3, Next.js, Inertia.js, Streamlit

ML / AI: Scikit-learn, XGBoost, PyTorch, YOLOv8, DistilBERT, LangChain, FAISS, SHAP, Gemini API, Claude API

Databases: MySQL, PostgreSQL, Supabase

Tools: Git, Docker, Redis, Riverpod, GoRouter, Postman, Claude Code

Concepts: REST APIs, RAG, CI/CD, Agile, Software Development Lifecycle, MCP

CERTIFICATIONS

- Claude Code in Action — Anthropic, Apr 2026
- Building with the Claude API — Anthropic, Apr 2026
- Introduction to Model Context Protocol — Anthropic, Apr 2026
- Claude 101 — Anthropic, Mar 2026

EDUCATION

B.Tech, Computer Science Engineering — GLS University, Ahmedabad | 7.8 CGPA · Sem VII 2023 – Present

Senior Secondary (Grade 11–12) — Sampoerna Academy, Indonesia 2020 – 2022

A Mathematics · A Physics · A Chemistry · A Computer Science*

Secondary School — Kasiga School, Dehradun | 92.6% · Valedictorian 2018 – 2020

ACHIEVEMENTS & ACTIVITIES

- Participant, Cybershadez Hackathon — built a full solution under a 24-hour time limit with a small team.
- 2nd Place, IT Extempore — impromptu technical speaking competition.
- Student Council, Events Department — Sampoerna Academy (2021–2022); helped plan and run school-wide events.
- 2nd Place, SIMCC Olympiad 2021.
- 2nd Place, SOF NSO and IMO Olympiad 2019.

LANGUAGES

English · Hindi · Sindhi · Gujarati

INTERESTS

Product design and UX, content creation, and building small tools that solve everyday problems.
