

KHUSHI SONEJI

Python Full-Stack developer

[GitHub](#) [LinkedIn](#) khushisoneji@gmail.com +91 9157150857 Ahmedabad, India.

CAREER SUMMARY:

Aspiring Full-Stack Software Developer with a strong interest in UI/UX design, Machine Learning, and AI-driven applications. Skilled in developing scalable software solutions, designing intuitive user experiences and building user-centric applications using Python, JavaScript, Flutter, SQL, and Figma. Passionate about continuous learning, innovation, and creating impactful digital products through creativity, collaboration, and adaptable technical skills.

TECHNICAL SKILLS:

- **Languages:** Python, Java, C, C++, PHP
- **Framework & Libraries:** NumPy, Pandas, Matplotlib, Tensorflow, Scikit-learn, OpenCV
- **Web & Mobile:** HTML, CSS, Flutter, Dart, React, JavaScript
- **AI / ML:** Artificial Intelligence, Machine Learning, Recommender System
- **Databases:** MySQL, PostgreSQL
- **Tools & Platforms:** Git, GitHub, Figma, VS Code, Eclipse, Android Studio

PROJECTS:

FEMWELL – AI-Powered PCOS Prediction & Personalized Wellness Platform

[GitHub](#)

- Developed a full-stack AI-powered PCOS wellness platform featuring PCOS prediction, symptom tracking, personalized recommendations, AI chatbot support, diet and exercise planning, and home remedies using Flutter, FastAPI, PostgreSQL, and Figma.
- A Machine Learning model with Scikit-learn for PCOS prediction, integrated the OpenRouter API for an AI chatbot, and implemented a personalized recommendation engine delivering tailored diet, exercise, lifestyle, and wellness suggestions based on user inputs.

Tech Stack: Python, Machine Learning, Scikit-learn, React.js, FastAPI, PostgreSQL, OpenRouter API

SUSTAIN-ME – Sustainable Lifestyle Recommendation System

[GitHub](#)

- Developed a machine learning-based recommendation system that suggests sustainable lifestyle choices based on user preferences and behavioral data. Implemented data preprocessing, feature analysis, and recommendation algorithms using Python and Scikit-learn to promote eco-friendly decision-making.

Tech Stack: Python, Machine Learning, Recommendation system, Pandas, NumPy, Scikit-learn

STUDYSMART – AI-Powered Study Hours Prediction System

- Developed a Machine Learning-based study planning system that predicts personalized study hours using academic and behavioral factors such as subject difficulty, sleep quality, focus level, energy, distractions, and consistency.
- Built and evaluated predictive models using Scikit-learn, implemented personalized study strategies with Pomodoro-based recommendations, subject-wise time allocation, and performance insights to enhance learning efficiency.

Tech Stack: Python, Machine Learning, Scikit-learn, Pandas, NumPy, Random Forest, Linear Regression, Decision Tree, SVR, Jupyter Notebook

EDUCATION:

2023 – Present | Faculty of Engineering & Technology, GLS University
Bachelor of Technology (Computer Science and Engineering) – **SGPA: 8.27**

CERTIFICATION:

- Cloud Foundation badge – 2026 AWS Academy Graduate
- Green Skills and Artificial Intelligence – 2025 Edunet Foundation
- Fundamentals of Java Programming – 2024 Coursera
