PROFESSIONAL SUMMARY

Final-year CS undergraduate specializing in AI/ML with hands-on experience building deep learning systems, recommendation engines, and full-stack applications. Shipped production-grade projects spanning explainable AI, LLM integration, and modern web platforms. Fluent in Python, TypeScript, Java, and SQL, with practical experience across REST APIs, OOP, Git, and Agile workflows.

EDUCATION

B.Tech — Computer Science & Engineering (AI/ML) | GLS University, Ahmedabad, GJ Aug 2023 – May 2027

CGPA: 7.62 / 10 (till Semester 6)

Senior Secondary (XII), CBSE | Krishna International Public School, Patan, GJ 2023

75.4%

Secondary (X), CBSE | Amarchand Singhvi International School, Gandhidham, Kutch-Bhuj, GJ 2021

79.4%

PROJECTS

AI-Powered Personalized Wellness Assistant

Jul 2025 – May 2026

Tech Stack: PyTorch • FastAPI • Streamlit • Gemini 2.5 Flash • SQLite • OpenCV

- Engineered an end-to-end dermatological web platform using FastAPI and Streamlit, integrating a fine-tuned EfficientNet-B3 model to classify 5 skin conditions with visual explainability via Grad-CAM heatmaps.
- Integrated Google Gemini 2.5 Flash to synthesize condition-specific wellness protocols and built a SQLite-powered dashboard to track daily adherence streaks and visualize symptom severity improvements over time.

Gifted — Smart Gift Recommendation Web App

Jan 2026 – Jun 2026

Tech Stack: Next.js 16 • TypeScript • Tailwind CSS • Zustand • Framer Motion

- Engineered a multi-stage hybrid recommendation pipeline integrating rule-based filtering (budget and occasion constraints) with content-based scoring to deliver accurate, personalized gift suggestions.
- Developed a fully responsive frontend utilizing Next.js and Tailwind CSS, leveraging Zustand for seamless state management across multi-step user questionnaires and LocalStorage for wishlist persistence.

WebTime Tracker — Browser Extension

Jul 2026 – Present

Tech Stack: JavaScript • Chrome Extension API (Manifest V3) • HTML5 • CSS3

- Engineered a privacy-focused Chrome extension using Manifest V3 to monitor active website engagement, leveraging the tabs, windows, and idle APIs to accurately detect tab switches and user inactivity thresholds.
- Developed a reliable background service worker with an event-driven sync pipeline and chrome.alarms fallback, persisting session durations to chrome.storage.local to maintain a secure, zero-external-server architecture.

TECHNICAL SKILLS

- Languages: Python, Java, TypeScript, JavaScript (ES6+), C, PHP, HTML/CSS, SQL (MySQL)
- ML / AI: PyTorch, TensorFlow, scikit-learn, NumPy, pandas, OpenCV, Matplotlib, EfficientNet-B3, Grad-CAM (Explainable AI), Google Gemini API, AI Sales Prospecting (Persana AI), supervised learning, classification, regression
- Frameworks & Libraries: Next.js, React, Node.js, Express, FastAPI, Streamlit, Tailwind CSS, Framer Motion, Zustand
- Tools & Platforms: n8n (automation workflows), Git, GitHub, VS Code, Jupyter Notebook, Linux CLI, PostCSS, ESLint, SQLite, Chrome Extension API (Manifest V3), REST APIs, Docker (familiar)
- Concepts: Data Structures & Algorithms, OOP, Machine Learning Pipelines, Recommendation Systems, Database Design, Information Security & Risk Analysis (NIST CSF, ISO 27001, GDPR)

CERTIFICATIONS & TRAINING

- AI Sales Prospecting: Automate Outreach at Scale with AI — Udemy
- Master n8n AI Agents: Build & Sell AI Agents and Automations — Udemy
- Green Skills and Artificial Intelligence — Skills4Future Program (Edunet Foundation / AICTE / Shell)
- AWS Cloud Seminar — GLS ACM Student Chapter
- Fundamentals of Java Programming — Coursera (Board Infinity)
