PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student with hands-on experience in AI/ML, Full Stack development, and System Architecture. Proven track record of engineering scalable, real-world applications, including zero-knowledge file-sharing platforms and real-time multiplayer coding arenas. Backed by enterprise-grade certifications from Oracle and Microsoft, I am passionate about solving complex technical challenges and leveraging core computer science principles to drive high-impact software engineering initiatives.

EDUCATION

GLS University <i>B.Tech. in Computer Science & Engineering (CGPA: 9.04 / 10)</i>	Ahmedabad, Gujarat 2023 – Present
Higher Secondary Education (12th) <i>Percentage: 72.15 / 100</i>	2023
Secondary Education (10th) <i>Percentage: 83.00 / 100</i>	2021

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript, Python, Java, SQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
Web Architecture: React.js, Node.js, Express.js, FastAPI, Socket.io, WebSockets, HTML5, CSS3, jQuery, Bootstrap
AI & Machine Learning: Google Gemini AI, PyTorch, Scikit-Learn, LangChain.js, LangGraph, Deep Learning, GenAI, LLMs, RAG, Vector Databases (Qdrant, ChromaDB)
Databases & Cloud: PostgreSQL, MongoDB, Mongoose, SQLAlchemy, Supabase, Redis, Microsoft Fabric, Oracle Cloud Infrastructure (OCI)
Security & Auth: JWT, bcrypt, Web Crypto API (AES-GCM), Role-Based Access Control
DevOps & Version Control: Git, GitHub, Open Source Development, CI/CD Pipelines

EXPERIENCE

Open Source Contributor (Hacktoberfest 2025) <i>DigitalOcean (Global Open Source Community)</i>	October 2025 Remote
– Actively contributed to the globally recognized Hacktoberfest 2025 initiative, collaborating with developer communities to resolve technical issues and optimize code logic. – Successfully submitted and merged multiple Pull Requests (PRs), demonstrating strong practical proficiency in Git, GitHub, and real-world version control workflows. – Recognition: Featured on official contributor acknowledgement pages for multiple open-source repositories and earned verified digital credentials via Holopin.	
AI Intern <i>Edunet Foundation</i>	June 2025 – July 2025 Remote
– Built and evaluated machine learning models utilizing modern AI frameworks and Microsoft Azure services to address real-world industrial use cases. – Performed data preprocessing and applied predictive modeling techniques on structured datasets to extract actionable insights.	

PROJECTS

CrimeGPT <i>React, FastAPI, PostgreSQL, ChromaDB, Gemini AI, LangChain, docxtempl</i>	June 2026 – July 2026
– Problem: Investigating officers re-enter the same case facts across 6–7 legal documents while manually identifying applicable statutes under India's new criminal code (BNS/BNSS/BSA). – Solution: Built an AI-powered legal documentation platform for law enforcement using RAG over ingested statute PDFs, mapping incident narratives to applicable sections with an explainable, citation-backed reasoning layer. – Key Features: Implemented human-in-the-loop review with field-level audit logging, multilingual (English/Hindi/Gujarati) document generation across 8 statutory templates, and a thread-safe multi-key LLM failover system for rate-limit resilience.	

- **Impact:** Built for Kanad S.H.I.E.L.D. 2026, a hackathon by Ahmedabad City Police Cyber Crime Branch; reduced est. drafting time per case from 45 minutes to 1.5 minutes.
- **Links:** [Live App](#) | [Source Code](#) | [Video Demo](#)

FinSight AI | *React, FastAPI, PostgreSQL, PyTorch, LangGraph, Gemini AI* April 2026 – June 2026

- **Problem:** Enterprise cloud cost anomalies are typically caught by static budget alarms, causing alert fatigue and requiring hours of manual investigation to identify root cause.
- **Solution:** Engineered a multi-cloud FinOps platform with a decoupled batch-and-serve architecture, running heavy ML inference offline so the live dashboard queries pre-computed results in under 50ms.
- **AI Layer:** Built a three-tier anomaly consensus engine (STL statistical decomposition, Isolation Forest, PyTorch LSTM Autoencoder) and a LangGraph-orchestrated agent that autonomously queries scoped billing data and generates root-cause-analysis reports via Gemini.
- **Key Features:** Implemented multi-tenant row-level data isolation and 90-day cost forecasting using Prophet/LightGBM.
- **Links:** [Live App](#) | [Source Code](#) | [Video Demo](#)

SyntaxReviser Pro | *React, Node.js, Socket.io, Gemini AI, MongoDB* Jan 2026 – Mar 2026

- **Problem:** Developers frequently experience "syntax decay" and lose muscle memory when switching between different programming languages.
- **Solution:** Architected a real-time multiplayer coding platform using Node.js and Socket.io, supporting 50+ concurrent users with <100ms latency for gamified 1v1 developer duels.
- **Key Features:** Integrated Google Gemini API to dynamically generate algorithmic problems. Developed a custom AST parser for intelligent indentation, backed by a MongoDB virtual economy.
- **Links:** [Live App](#) | [Source Code](#) | [Video Demo](#)

DropZone | *Node.js, Web Crypto API, Socket.io, Supabase* Nov 2025 – Dec 2025

- **Problem:** Developers face security risks and friction transferring files on public lab computers, often avoiding personal logins.
- **Solution:** Engineered a stateless, zero-knowledge ephemeral file-sharing app implementing the Web Crypto API (AES-GCM 256-bit), securely processing client-side payloads up to 50MB.
- **Key Features:** Built a peer-to-peer radar using HTML5 Geolocation (Haversine formula). Integrated Gemini AI to enforce a strict database TTL policy on Supabase, ensuring zero data retention.

ACHIEVEMENTS

Winner (1st Place) – Tech Hackathon March 2025
Cyber Shadex 2025 (GLS University)

- Engineered and pitched **SyntaxReviser Pro**, securing 1st place out of multiple teams for technical complexity and real-world application.

Runner-Up – Code Relay March 2025
Cyber Shadex 2025 (GLS University)

- Collaborated in a high-pressure, timed team-based coding competition requiring rapid problem-solving and context switching.

Winner (3rd Place) – Internal SIH Hackathon September 2024
GLS University

- Developed an innovative software prototype under strict time constraints to secure a podium finish in the Smart India Hackathon internal qualifiers.

Competitor – Petpooja Track 2025
Hack-NU-thon 6.0 (Nirma University & Petpooja)

- Rapidly engineered a technical prototype addressing complex, real-world restaurant management problem statements.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional <i>Key Skills: Generative AI, Large Language Models (LLM), Retrieval-Augmented Generation (RAG)</i>	Oracle
Oracle Cloud Infrastructure 2025 Certified Data Science Professional <i>Key Skills: Artificial Intelligence (AI), Machine Learning, Data Science, Data Analytics</i>	Oracle
Oracle Cloud Infrastructure 2025 Certified DevOps Professional <i>Key Skills: DevOps, CI/CD Pipelines, Cloud Infrastructure</i>	Oracle
Oracle Cloud Infrastructure AI Foundations Associate <i>Key Skills: Artificial Intelligence (AI), Generative AI, Machine Learning, Anaconda</i>	Oracle
Microsoft Certified: Fabric Analytics Engineer Associate <i>Key Skills: Microsoft Fabric, Data Engineering, Power BI, Data Analytics</i>	Microsoft
