

UJAS DUBAL

Computer Science Engineer

dubalujas@gmail.com | 91+ 9714893937 | Ahmedabad, Gujarat

SUMMARY

Final-year B.Tech CSE (AI/ML Track) student at GLS University. Experienced in building full-stack and AI-powered applications, with hands-on expertise in Flutter, FastAPI, Python, and cloud platforms. Demonstrated ability to deliver end-to-end systems—from mobile UI to deep learning backends—through a university Capstone Project involving real-world civic technology.

EDUCATION

Bachelor of Technology – Computer Science & Engineering

Pursuing (2023-2027)

GLS University (Gujarat Law Society), Ahmedabad

- AI/ML Track
- CGPA: 6.8 / 10

Class 12 – Science

June 2022 – May 2023

Utkarsh School of Excellence

- Percentage: 70%

Class 10

June 2020 – May 2021

Utkarsh School of Excellence

- Percentage: 70%

TECHNICAL SKILLS

Languages: Python, Dart, JavaScript, C++, SQL, C, Java

Frameworks & Libraries: Flutter, FastAPI, YOLOv11, OpenCV, NumPy, PyTorch, Riverpod

Databases: PostgreSQL (PostGIS), SQLite, Supabase

Tools & Platforms: Git, GitHub, VS Code, Postman, Roboflow, Google Colab, Supabase Cloud

CS Fundamentals: DSA, OOP, DBMS, OS, Computer Networks

PROJECTS

FixMyRoad — AI-Powered Road Damage Detection & Repair Management System July 2025 – May 2026

Flutter • FastAPI • YOLOv11 • Depth Anything V2 • Supabase • PostgreSQL/PostGIS • Python

- Built a cross-platform civic app (Flutter) where citizens report potholes via GPS-tagged photos; YOLOv11 instance segmentation detects road damage at pixel level with ~88% confidence score.
- Integrated Depth Anything V2 monocular depth estimation to classify severity (shallow / moderate / deep) and auto-calculate required asphalt quantity (kg) and repair cost in INR.
- Developed role-based dashboards for Citizens, Engineers, and Admins with real-time status updates via Supabase Realtime WebSocket; full AI pipeline completes within 65 sec on CPU / 14 sec on GPU.
- Implemented offline report queuing (SQLite), duplicate detection using PostGIS ST_DWithin, and a priority scoring algorithm combining depth metrics, community upvotes, and severity classification.

KEY SKILLS

- Problem-Solving • Team Collaboration • Time Management
- Analytical Thinking • Communication • Adaptability
