ABOUT ME

Computer Science student specializing in Artificial Intelligence and Machine Learning with hands-on experience in full-stack development and AI-powered applications. Skilled in React.js, Python, TensorFlow, JavaScript, and REST API integration with a strong focus on building scalable and user-friendly products. Passionate about solving real-world problems through intelligent systems and modern web technologies.

EDUCATION

GLS University

2023-2027

BTech - Computer Science - 7.2 / 10

Specialization: Artificial Intelligence and Machine Learning

PROJECTS

MoodyPlayer – Music Recommendation App

Dec - 2025

Tech Stack: React.js, TypeScript, TensorFlow.js, Face API, YouTube API

- Developed an AI-powered music recommendation platform based on real-time facial emotion detection.
- Implemented client-side emotion analysis using TensorFlow.js and Face API to ensure privacy-focused processing.
- Integrated YouTube API to generate personalized playlists according to detected mood.

[Github](#)

DEEPPAKE DETECTION – AUDIO, IMAGE & VIDEO

Apr - 2026

Tech Stack: Python, TensorFlow, CNN, AudioNet, XceptionNet

- Developed a multimodal deepfake detection system for identifying manipulated audio, image, and video content.
- Implemented AudioNet architecture to detect synthesized voice patterns using spectral feature extraction.
- Applied XceptionNet CNN model for accurate classification of fake and real frames.

TURF ACE

In Progress

Tech Stack: MERN Stack

- Built a full-stack web application connecting users with nearby sports turfs and facilities.
- Developed booking and management modules for turf owners to manage
- Added live scoreboards and player performance tracking
- Improved digital management workflow for sports facility operations.

TECHNICAL SKILLS

Languages

AI/ML

- Python
- JavaScript
- SQL
- TensorFlow
- CNN
- Ensemble techniques
- Supervised / Unsupervised Algorithms
