EDUCATION

GLS University, Ahmedabad

B.Tech — Computer Science Engineering | 2023 – 2027 | CGPA: 6.21

TECHNICAL SKILLS

Programming and Scripting: Python, Bash, C, C++, Java, JavaScript, SQL

Cybersecurity Skills: Network Security, Vulnerability Assessment, Penetration Testing, Incident Response, Threat Detection, Log Analysis, Malware Analysis, Security Monitoring, OWASP Top 10, Security Automation

Security Tools: Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, Splunk, ELK Stack, VirtualBox

Networking: TCP/IP, DNS, HTTP/HTTPS, Firewalls, IDS/IPS, VPN, OSI Model

Cloud and Platforms: AWS (basics), Firebase, Docker, Linux CLI, Git, GitHub

Frameworks: Flask, FastAPI, Flutter, NIST Cybersecurity Framework

Core Competencies: SOC Operations, SIEM Administration, JWT Authentication, Role-Based Access Control (RBAC), Risk Assessment, Security Documentation, Agile Methodology

PROJECTS

SOAR — Security Orchestration, Automation, and Response

Group Capstone Project • Role: Frontend Developer

A team-built cybersecurity platform that enables organizations to aggregate security threat data from multiple sources and automate responses to low-level security incidents. Contributed as the Frontend Developer, responsible for designing and building the user interface.

My Contributions (Frontend):

- **UI Development:** Built responsive dashboard interfaces using HTML, CSS, and JavaScript to visualize security alerts and incident status in real time.
- **React Components:** Developed reusable React components for displaying orchestration workflows, automation logs, and threat response playbooks.
- **Team Collaboration:** Worked closely with backend team members to integrate REST APIs and ensure seamless data flow between the frontend and security tools.

CERTIFICATIONS

- Coursera Online learning certification — Computer Science / Technology domain
- Blueberry (Trading) Funded certification in Trading — Financial markets and investment fundamentals

PROFILE SUMMARY

Motivated B.Tech Computer Science student at GLS University (Batch 2023–2027) with hands-on experience in front-end web technologies including HTML, CSS, JavaScript, and React, and a growing skill set spanning cybersecurity, networking, and cloud fundamentals. Contributed as a Frontend Developer in a group capstone project building a SOAR cybersecurity platform, gaining practical experience in team-based development and API integration. Passionate about crafting clean, responsive user interfaces and continuously expanding expertise across both frontend development and cybersecurity domains.
