

RIYA SHAH

B.Tech – Computer Science & Engineering (AI & ML Specialization)

riyashah1208@gmail.com | +91 9662479227 | [linkedin.com/in/riya-shah-b3b534277/](https://www.linkedin.com/in/riya-shah-b3b534277/) | github.com/Riya-Shah12 | Ahmedabad, India

PROFESSIONAL SUMMARY

Computer Science student specializing in AI & ML with hands-on experience in Machine Learning, data analysis, and intelligent application development. Built AI-powered applications including a healthcare assistant using DistilBERT and an end-to-end Customer Churn Prediction system with custom machine learning implementation. Skilled in Python, React.JS, with a strong interest in building impactful AI solutions and innovative technology products. Seeking opportunities in AI/ML and Software Development to apply technical skills and gain industry experience.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, C, SQL

ML & AI: Machine Learning, NLP, Scikit-Learn, PyTorch, NumPy, Pandas

Development: Flutter, React.js, MySQL, HTML5, CSS3, PHP

Tools: Github, Linux

EXPERIENCE

Machine Learning Intern | Launched Global (Remote)

Mar 2026 – Apr 2026

- Built a Customer Churn Prediction System using a custom Logistic Regression model with gradient descent optimization and threshold tuning.
- Applied end-to-end ML workflows — data preprocessing, feature engineering, model training, evaluation, and benchmarking against Scikit-Learn.
- Performed EDA and data visualization to uncover retention patterns; evaluated using accuracy, precision, recall, and F1-score.

JavaScript Intern | MULTIQOS

Jun 2023 – Jul 2023

- Built interactive UI components using JavaScript, strengthening frontend development and client-side scripting skills.

PROJECTS

MediCare – AI Healthcare Assistant — Python, PyTorch, DistilBERT, FastAPI, Flutter

- Fine-tuned DistilBERT for disease prediction; integrated via a JWT-authenticated FastAPI REST API with role-based access control.
- Built Flutter mobile/web apps with Supabase for auth and database; implemented automated PDF prescription generation.

Customer Churn Prediction System — Python, NumPy, Pandas, Scikit-Learn

- Built Logistic Regression classifier from scratch with gradient descent and threshold tuning; benchmarked vs. Scikit-Learn models.
- Performed data preprocessing, feature engineering, and EDA; evaluated using standard classification metrics.

Furniture Recommendation System — Python, KNN, Apriori, Machine Learning

- Developed a product recommendation engine using KNN and Apriori to suggest furniture based on user preferences and purchase patterns.

EDUCATION

B.Tech – CSE (AI & ML Specialization) | GLS University, Ahmedabad

2024 – 2027

Current SGPA: 8.97 / 10

Diploma in Computer Engineering | LJ University, Ahmedabad

2021 – 2024

CGPA: 8.92 / 10

Class X (GSEB) | Shiv Ashish School, Ahmedabad

2021

Percentage: 83%

CERTIFICATIONS & ACHIEVEMENT

- IBM Python 101 for Data Science – IBM SkillsBuild (2025)
- Fundamentals of Java Programming – Coursera / Board Infinity (2024)
- Core Team Member (Graphics Designer) & Volunteer – GLS ACM Student Chapter (2025 – Present)
