Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with a strong interest in software development and problem-solving. Built academic and personal projects to develop practical skills and strengthen technical and analytical abilities. Eager to learn, grow, and contribute to engineering teams through internships and entry-level software development opportunities.

PROJECTS

Diabetic Retinopathy Detection using Deep Learning [GitHub](#)

Tech Stack: Python • TensorFlow • OpenCV • Flask • NumPy • Matplotlib

- Designed and developed a deep learning application to detect diabetic retinopathy from retinal fundus images.
- Preprocessed retinal images and trained a convolutional neural network for diabetic retinopathy classification.
- Evaluated model performance using training and validation metrics and analyzed prediction results.
- Developed a Flask-based web application that enables users to upload retinal images and receive prediction results through an easy-to-use interface.

INTERNSHIP EXPERIENCE

Python / Machine Learning Intern June 2023 – July 2023

Maxgen Technologies Pvt. Ltd., Ahmedabad

- Completed a one-month internship focused on Python programming and machine learning fundamentals.
- Applied Python concepts through practical programming exercises and guided assignments.
- Gained foundational knowledge of machine learning concepts through hands-on training.
- Improved programming, debugging, and analytical skills by working on practical tasks.
