SUMMARY

B.Tech undergraduate in Computer Science & Engineering, specializing in Cyber Security, with an interest in technology-driven business operations and client communication. Combines technical understanding with research, structured communication, and a basic understanding of business processes. Seeking an entry-level opportunity in business development where I can learn the product thoroughly, understand customer requirements, and contribute to lead coordination and long-term client relationships.

SKILLS

Professional: Stakeholder Communication, Structured Writing, Documentation, Basic Understanding of Business Operations

Technical: Software and Mobile Application Fundamentals, Cybersecurity Fundamentals, Python, HTML/CSS, Android Studio

Analytical & Research: Open-Source Research, Information Gathering and Analysis, Understanding Business and Product Requirements, Structured Reporting, Risk Assessment Fundamentals

ACADEMIC PROJECTS

SafeText AI – Smart SMS Protector | Android App | Team of 3

Capstone Project

- Led a team of three to conceptualize and design SafeText AI, an offline Android SMS threat detector; structured the product features, designed the layouts, and managed task delegation throughout development.

Scrap House – Smart Scrap Calculator & Pickup Scheduler | Android App

- Developed an Android project as a personal showcase to demonstrate skills in building clean, responsive layouts and local database flows that catalog recyclables, calculate weights, and schedule mock pickup bookings.
