

SHUBHAM G PATTANI

Gujarat, India | +91 94083 93508 | shubhampattani@gmail.com

PROFESSIONAL SUMMARY

Highly motivated and results-oriented Computer Science and Engineering undergraduate with a strong academic foundation in software development, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, and modern web technologies. Passionate about leveraging technology to solve complex real-world challenges and create innovative, scalable, and user-centric solutions. Skilled at translating ideas into functional applications through hands-on project development, continuous learning, and a problem-solving mindset. Possesses strong analytical abilities, attention to detail, and the adaptability required to thrive in fast-paced and evolving technological environments. Demonstrates a commitment to technical excellence, collaboration, and lifelong learning while staying updated with emerging industry trends and best practices. Eager to contribute technical expertise, creativity, and dedication to high-performing teams, delivering impactful solutions that drive organizational success while continuously advancing professional and personal growth.

EDUCATION

GLS University, Ahmedabad

Bachelor of Computer Science & Engineering

Expected Graduation: 2027

Sir Bhavsinhji Polytechnic Institute, Bhavnagar

Diploma in Electrical Engineering

CGPA: 6.82 | CPI: 6.98 | 2019 – 2022

PROJECT

Decentralized Identity & Verifiable Credentials Platform

Blockchain-Based Secure Digital Identity Management Solution

- Developed a blockchain-based digital identity management platform to enable secure and privacy-preserving identity verification.
- Implemented verifiable credential issuance and validation mechanisms to ensure authenticity and prevent credential tampering.
- Designed a decentralized authentication workflow, reducing dependency on centralized identity providers.
- Focused on enhancing user privacy, data security, and trust through cryptographic verification techniques.
- Collaborated on system design, development, testing, and deployment while applying software engineering best practices.

TECHNICAL SKILLS

Communication Skills, Team Collaboration, Leadership & Coordination, Customer Relationship Management, Computer Literacy, Problem Solving, Time Management, Microsoft Office, Adaptability

LANGUAGES

English | Hindi | Gujarati
