

ZEESHANA GHORI

Ahmedabad, Gujarat, India | ghorizeeshana@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science & Engineering student specializing in Cyber Security, with hands-on experience building web applications, secure identity workflows, APIs, and technical projects. Strong technical foundation combined with an interest in AI-native content and growth, including AI-assisted research, prompt design, structured writing workflows, technical communication, content ideation, and iterative improvement. Able to quickly understand technical products and translate complex features into clear, structured, audience-focused explanations. Brings an engineering mindset to content: build repeatable systems, verify accuracy, experiment with formats, and continuously improve output.

CORE SKILLS

AI & Content Workflows: AI-Assisted Research, Prompt Design, Structured Prompting, Research-to-Outline Workflows, Drafting & Editing Loops, Content Ideation, Content Repurposing, Fact Checking & Output Review

Content & Communication: Technical Writing, Product Explainability, Content Structuring, Hooks & Headlines, Scannable Writing, CTAs, Audience-Focused Communication

Technical Skills: Java, Python, JavaScript (ES6+), React.js, Node.js, Express.js, RESTful APIs, HTML5, CSS3, Git, GitHub, Postman, NPM, Markdown, Basic HTML

Cyber Security & Product Understanding: Authentication & Authorization, SHA Hashing, HMAC Validation, RSA-Based Verification, REST API Security, Backend Validation, Secure Communication Concepts

Workflow & Collaboration: Problem Solving, Documentation, SDLC, Agile, Testing, Debugging, Rapid Learning, Team Collaboration

PROJECTS & HACKATHON EXPERIENCE

CrimeGPT – Kand Shield Cyber Security Hackathon | Final Round Qualifier

- Qualified through multiple stages to reach the final round of a competitive cybersecurity hackathon.
- Collaborated with a team on problem analysis, solution design, and presentation for a cybersecurity-focused project.
- Developed practical experience in rapidly understanding technical problems and communicating a solution under time constraints.
- Project: <https://crimegpt-ten.vercel.app/>

Decentralized Identity Verification System | Node.js, Express.js, JavaScript, Blockchain | July 2025 – Present

- Designed secure identity verification workflows using RESTful APIs and decentralized identity concepts.
- Implemented authentication and backend validation using SHA hashing, HMAC validation, and RSA-based verification.
- Worked with complex technical concepts involving identity, security, and data integrity—building strong foundations for explaining technical products accurately.
- Performed testing and debugging to improve application reliability and secure API communication.

Dr. Maya Website | React.js, JavaScript | February 2026

- Developed responsive and user-friendly web interfaces using reusable React components.
- Integrated REST APIs and implemented client-side validation and routing to improve information flow and user experience.
- Participated in testing, debugging, and refinement, strengthening attention to clarity, accuracy, and user-focused experiences.

Smart Cart Billing System | Capstone Project | September 2023 – April 2024

- Developed an automated billing solution focused on improving retail checkout efficiency and simplifying application workflows.
- Collaborated during requirement gathering, implementation, testing, and project delivery.
- Applied SDLC concepts and assisted in debugging and validating application functionality.

EDUCATION

Bachelor of Technology – Computer Science & Engineering | GLS Institute of Computer Technology | 2024 – 2027

Specialization: Cyber Security

Diploma – Computer Science & Engineering | L.J. Polytechnic | 2021 – 2024

CERTIFICATIONS

- Java Programming
- Python Programming
